PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **Python** applications and data pipelines, focusing on clean, efficient, and well-documented code for batch and real-time processing.
- Assisted in the development and testing of **PySpark**-based data processing jobs for large-scale datasets, working under the guidance of senior engineers.
- Worked with **Python data libraries** such as **Pandas** and **NumPy** for data analysis, transformation, and validation, ensuring data integrity and accuracy.
- Debugged and resolved issues in batch and data-processing jobs, improving overall system stability and performance.
- Participated actively in **code reviews**, adhering to best practices in performance optimization and robust data handling methodologies.
- Collaborated effectively with cross-functional teams, including **data engineers**, **QA**, and **DevOps**, to ensure seamless project delivery and integration.
- Managed and deployed containerized applications using **Docker** on **AWS EC2** instances, integrating with **CloudWatch** for monitoring and logging.

SKILLS

Programming Languages – Python, PySpark, SQL, Java

Data Libraries & Frameworks – Pandas, NumPy, scikit-learn

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

Containerization – Docker

Databases – PostgreSQL, MySQL, Oracle

Tools & Methodologies – Git, Jenkins, Jira, Agile, Scrum

Financial Services – Data Engineering, Transaction Monitoring, Reconciliation Workflows

PROJECTS

Python Data Pipeline for Financial Reporting

- Engineered a robust **Python** data pipeline using **Pandas** and **SQL** to automate the generation of weekly financial reconciliation reports, reducing manual effort by approximately 15 hours per week.
- Implemented data validation checks and error handling mechanisms within the pipeline to ensure the accuracy and completeness of processed financial transaction data.
- Deployed the Python script as a scheduled job on **AWS Lambda**, integrating with **S3** for data storage and retrieval.

Batch Data Processing and Validation Service

- Developed a batch processing service in **Python** to ingest and transform large volumes of operational data from multiple sources, handling approximately 50,000 records per batch.
- Integrated **NumPy** for efficient numerical operations and implemented data validation routines to identify and flag anomalies before downstream processing.
- Containerized the service using **Docker** for consistent deployment across development and production environments.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
