PROJECTS

Laboratory System Validation and Documentation (HCL Technologies)

- Developed comprehensive **validation documentation** and **IOQ protocols** for critical laboratory information management systems, ensuring compliance with pharmaceutical industry standards.
- Automated the generation of system configuration reports using **Python** and **SQL**, reducing report generation time by **~30%** for the quality control team.
- Collaborated with cross-functional teams, including laboratory analysts and IT operations, to gather requirements and validate system functionalities prior to go-live.

Enterprise Application Support & Automation (HCL Technologies)

- Provided **production support** for critical enterprise applications, troubleshooting issues using **Splunk** logs and adhering to strict **SLAs** for P1 incidents.
- Engineered **Python automation scripts** to streamline data extraction and reconciliation processes for financial operations dashboards, improving data accuracy and timeliness.
- Contributed to the development of **Java Spring Boot** microservices, implementing new features and resolving defects in a high-availability production environment.
