PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and implemented **core backend systems** for dynamic content resolution and delivery, handling millions of requests daily by optimizing execution pipelines with strong performance guarantees.
- Evolved **APIs and data models** with long-term stability in mind, catering to billions of requests per month across multiple internal teams and external customers.
- Owned the development and maintenance of **complex, long-lived production systems**, focusing on observability, debugging, and operational reliability within a remote-first European team.
- Collaborated closely with product managers and other engineers to define technical requirements and integrate new services into a high-performance ecosystem, improving cross-team development velocity by **15%**.
- Implemented **deterministic, cache-aware execution pipelines**, ensuring consistent delivery of structured content tailored for diverse digital experiences.
- Developed on our platform using services like **AWS, CloudFlare, Docker, and Kubernetes**, contributing to infrastructure as code practices with **Terraform**.
- Contributed to system design discussions, articulating technical choices for maintainability and performance, and actively participating in **code reviews** for junior engineers.

SKILLS

Backend Development – System Design, Performance Optimization, Maintainability, API Design, Schema Evolution, Versioning Strategies, Deterministic Execution, Cache-Aware Systems

Cloud & DevOps – AWS, CloudFlare, Docker, Kubernetes, Terraform, Observability, Debugging, Operational Reliability

Programming Languages – Java, Python, SQL

Frameworks & Libraries – Spring Boot, Hibernate, JPA, pandas, NumPy, scikit-learn, Flask, FastAPI

Databases – PostgreSQL, MySQL, Oracle

Tools & Methodologies – Jenkins, Git, Jira, Confluence, Agile, Scrum, REST APIs, GraphQL, TypeScript

PROJECTS

Enterprise Content Delivery Service (HCL Technologies)

- Engineered a **Java Spring Boot microservice** to manage and deliver structured content, integrating with a PostgreSQL database and exposing REST APIs for consumption by various client applications.
- Implemented **Hibernate** for efficient data access and persistence, optimizing query performance for large content sets and reducing average response times by **20%**.
- Developed comprehensive unit and integration tests using **JUnit** and **Mockito**, ensuring code quality and maintaining a 90% test coverage rate for critical service modules.

Content Modelling Platform Enhancements (HCL Technologies)

- Designed and implemented updates to **content schemas** and versioning strategies to support new customer requirements for dynamic content personalization.
- Collaborated with business analysts to gather requirements for enhanced content transformation pipelines, translating needs into technical specifications for backend Java development.
- Supported the integration of the enhanced platform with downstream systems, ensuring seamless data flow and data integrity across interconnected enterprise applications.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
