PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and commissioned automation control systems for bespoke machinery and manufacturing processes, integrating hardware and software components.
- Wrote and maintained **Python scripts** for data extraction, transformation, and loading (ETL) to support operational reporting and system integrations.
- Managed **Java Spring Boot** microservices, implementing new features and resolving defects in production environments with strict SLAs.
- Designed and implemented **REST APIs** for seamless data exchange between enterprise systems, ensuring efficient cross-system integration.
- Contributed to the development of **CI/CD pipelines** using Jenkins and Git, automating build, test, and deployment processes for faster release cycles.
- Supported production environments by analyzing logs using **Splunk** and **Dynatrace**, responding to P1/P2 incidents and ensuring system stability.
- Containerized applications using **Docker** and deployed them to **AWS EC2** instances, managing basic configurations and resource allocation.

SKILLS

Automation & Control – Rockwell, Ignition, Siemens, OSI PI Historian, VBA, Robotics, Safety Standards

Programming Languages – Python, Java, SQL, R, VBA, Shell Scripting

Frameworks & Libraries – Spring Boot, Hibernate, JPA, pandas, NumPy, scikit-learn, Flask, FastAPI

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, Kubernetes

Databases – PostgreSQL, MySQL, Oracle

Observability & Monitoring – Splunk, Dynatrace, CloudWatch

Operating Systems – Linux

PROJECTS

Industrial Control System Integration (HCL Technologies)

- Developed a **Java Spring Boot** application to interface with an industrial control system, processing real-time sensor data for operational monitoring.
- Implemented a data pipeline using **Python** and **SQL** to extract, aggregate, and load sensor readings into a PostgreSQL database for historical analysis.
- Designed and built a **REST API** to expose processed sensor data to a client-facing dashboard, enabling remote system status checks.

Automated Reporting Solution (HCL Technologies)

- Engineered **Python scripts** to automate the generation of daily operational reports by querying data from multiple enterprise systems via **SQL**.
- Integrated the reporting script into a **Jenkins** pipeline for scheduled execution and automated delivery via email, reducing manual effort by approximately 8 hours per week.
- Collaborated with business analysts to refine report requirements and ensure data accuracy, leading to improved decision-making for the operations team.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
