PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Led elicitation and documentation of business requirements for a multi-year transformation program, translating complex business needs into clear, traceable functional and non-functional specifications for a new CRM platform.
- Defined target-state processes and user journeys by collaborating with business subject matter experts and operational teams, ensuring solutions enhanced customer experience and met strategic outcomes.
- Created UAT strategies, comprehensive test plans, and detailed test scripts, ensuring accurate validation of requirements and user experience intent for a new financial services workflow.
- Coordinated User Acceptance Testing cycles, managing tester readiness, defect triage, and securing business sign-off, ensuring traceability back to initial requirements.
- Facilitated workshops and playback sessions between business stakeholders and technology teams to ensure alignment on solution designs and project progress, building consensus across diverse groups.
- Identified opportunities to simplify business processes and standardize workflows, contributing to the overall design principles and business rules underpinning the transformation initiative.
- Supported deployment planning by coordinating cutover activities and business readiness checkpoints, ensuring impacted teams were prepared for upcoming system changes.

SKILLS

Business Analysis & Requirements – Requirements Elicitation, Functional Specifications, Non-Functional Specifications, UAT Strategy, Test Planning, Test Scripting, User Journeys, Process Mapping, Stakeholder Engagement, Change Management

Financial Services & Transformation – Transformation Programmes, Regulated Environments, Customer Experience (CX), User Experience (UX), Business Process Improvement, Operational Adoption, Digital Transformation

Tools & Methodologies – Agile Methodologies, Scrum, Jira, Confluence, CRM Platforms, Workflow Automation Tools, Enterprise Platforms, Data Analysis

Technical Skills – SQL, Python, Java, Spring Boot, REST APIs, AWS, Docker, Linux, PostgreSQL, MySQL, Oracle

Data & Analytics – Power BI, Tableau, DAX, Power Query, Data Modelling, Data Warehousing, Statistical Analysis, R, pandas, NumPy, scikit-learn

PROJECTS

Financial Services Workflow Automation

- Developed Python scripts to automate data validation and ETL processes for a financial services operations dashboard, ensuring data accuracy for critical reporting.
- Designed and implemented automated reconciliation workflows using SQL across PostgreSQL and Oracle databases, reducing manual reconciliation effort by approximately 20% for a key client process.
- Contributed to the development of REST APIs in Java Spring Boot to integrate the operations dashboard with upstream and downstream financial systems.

Customer Onboarding Analytics Dashboard

- Built interactive Power BI dashboards to visualize customer onboarding funnel metrics and identify key drop-off points for a new enterprise customer segment.
- Created complex DAX measures and Power Query transformations to aggregate data from multiple sources, enabling stakeholders to track onboarding success rates in near real-time.
- Collaborated with business analysts to define reporting requirements and delivered tailored reports that supported strategic decisions on customer engagement improvements.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

**B.E. Computer Science — SNS College of Technology, Coimbatore,
India**

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
