PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and maintained **CAD data** for agricultural machinery, implementing updates to workshop drawings to reflect design changes across multiple product lines.
- Authored comprehensive **technical documentation** including user manuals and parts books, ensuring clarity and accuracy for both service technicians and end-users.
- Collaborated with engineering and operations teams to gather requirements and troubleshoot design-for-manufacture challenges, contributing to improved product reliability.
- Managed digital assets and maintained organized **file management systems** within a state-of-the-art design center environment, ensuring efficient access to project data.
- Developed and executed **Python scripts** to automate data processing tasks related to engineering reports and operational metrics, reducing manual effort by approximately 15%.
- Supported production environments for financial services applications, performing **incident response** for P1/P2 issues and managing SLAs to ensure system availability.
- Containerized Java Spring Boot applications using **Docker** and managed deployments to AWS EC2 instances, facilitating smoother and more consistent releases.

SKILLS

CAD Software – Solidworks, CAD Design

Technical Writing – User Manuals, Parts Books, Documentation

Engineering Principles – Design for Manufacture, Problem Solving, Mechanical Engineering

Software Development – Java, Spring Boot, Python, REST APIs, Docker

Data & Analytics – Power BI, DAX, Tableau, SQL, pandas, NumPy

Operations & Support – Splunk, Dynatrace, AWS, Linux, Jenkins, Jira

PROJECTS

Agricultural Machinery CAD Data Management System

- Developed a structured system for managing and updating **CAD drawings** for a range of farm machinery, ensuring all documentation was current with design iterations.
- Created detailed **parts lists and assembly instructions** derived from CAD models, supporting the manufacturing floor and streamlining the assembly process.
- Implemented version control for design files, tracking changes and ensuring historical integrity of the **engineering data** for future reference and analysis.

Automated Reporting for Manufacturing Metrics

- Engineered **Python scripts** to extract and process data from engineering databases, generating weekly reports on key manufacturing metrics.
- Designed and built interactive **Power BI dashboards** to visualize production throughput, defect rates, and machine uptime, providing actionable insights to the operations team.
- Performed data validation and cleaning using **SQL and pandas** to ensure the accuracy and reliability of the data presented in the reports and dashboards.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
