PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Managed requests for standard extracts like Spots 4x, Standard Trade, and Taxlot, ensuring timely delivery to internal Operations and Client Integration teams.
- Configured and maintained electronic interfaces for outbound data exchange from internal applications, addressing configuration requirements and file flow logic.
- Provided level one support for standard extract generation, troubleshooting and resolving file or data issues to minimize operational impact.
- Collaborated with Client Integration teams to define requirements and develop new standard Spots/STRD/Taxlot extracts for client reporting needs.
- Engaged with Data Management teams to verify and ensure the correct delivery of standard extracts, maintaining data integrity and accuracy.
- Researched and troubleshooted problems reported by operations teams, identifying root causes and implementing workarounds or escalating for resolution.
- Developed Python scripts to automate the generation and delivery of scheduled reports for internal stakeholders, reducing manual effort by approximately **15%**.

SKILLS

Data Operations – Standard Extracts, Outbound Reporting, Client Integration, Vendor Management, Data Delivery, File Generation

Financial Services – Hedge Fund Administration, Portfolio Data, Trade Processing, Pricing Data, Reconciliation Workflows, Transaction Monitoring

Core Technologies – SQL, Python, Java, Spring Boot, REST APIs, PostgreSQL, Oracle, MySQL

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Analytics & BI – Power BI, Tableau, DAX, Power Query, Data Modelling, R, pandas, NumPy, scikit-learn

Enterprise Systems – ERP Integration, Change Management, Jira, Confluence, Splunk, Dynatrace

PROJECTS

Automated Financial Reporting Pipeline

- Developed a Python-based ETL pipeline to extract, transform, and load data from multiple relational databases (**PostgreSQL, Oracle**) into a central data warehouse.
- Engineered automated daily and weekly reports using **Power BI**, visualizing key operational metrics and trends for business stakeholders, which were adopted by the finance team.
- Implemented error handling and logging mechanisms within the Python scripts, reducing report generation failures by approximately **20%** and improving traceability.

Client Data Extract Configuration Tool

- Designed and built a Java Spring Boot application with a RESTful API to manage the configuration of client-specific data extracts, replacing manual spreadsheet tracking.
- Integrated the application with a **PostgreSQL** database to store and retrieve extract configurations, enabling dynamic generation of extract definitions based on client profiles.
- Developed a simple UI using basic HTML/JavaScript to allow operations teams to quickly look up and verify configurations, improving query resolution times for client data requests.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
