PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and implemented **Java Spring Boot** RESTful APIs for inter-service communication, handling approximately **1,500 requests per second** during peak loads.
- Developed and maintained **JPA** entities and performed complex database operations against **PostgreSQL**, ensuring data integrity for critical financial reporting modules.
- Authored comprehensive **JUnit** tests and utilized **Mockito** for mocking dependencies, achieving over **85% code coverage** for newly developed Java components.
- Analyzed and translated complex healthcare system integration requirements into technical specifications for **HL7** and **FHIR** interfaces, collaborating directly with client technical teams.
- Configured and tested interface work packages within an integration engine environment, mapping data structures between **JSON** and **HL7** message formats for client deployments.
- Provided technical support for troubleshooting integration issues, identifying and resolving root causes that posed potential clinical risks, ensuring system stability.
- Containerized Java applications using **Docker** and deployed them to **AWS EC2** instances, managing configurations via **Git** and automated builds through **Jenkins** pipelines.

SKILLS

Programming Languages – Java, Python, SQL, R, JSON, HL7, FHIR, ASTM, TCP/IP

Frameworks & Libraries – Spring Boot, JPA, Hibernate, JUnit, Mockito, pandas, NumPy, scikit-learn

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Databases – PostgreSQL, MySQL, Oracle

Tools & Technologies – Splunk, Dynatrace, Jira, Confluence, Power BI, Tableau, RStudio

Domain Knowledge – Healthcare Systems Integration, Enterprise Application Support, Payments Operations, ERP Integration, Data Analytics, Business Intelligence

PROJECTS

Healthcare Interoperability Platform (HCL Technologies)

- Engineered **Java Spring Boot** microservices to facilitate data exchange between disparate healthcare applications, adhering to **HL7** standards for patient demographics.
- Developed robust data mapping logic to transform data between **JSON** payloads and **HL7 v2.x** messages, supporting a **~20%** increase in successful message transmissions.
- Integrated application monitoring using **Splunk** and implemented automated deployment pipelines via **Jenkins** for seamless updates to the integration engine.

Patient Data Synchronization Service (MSc Applied Project)

- Designed and implemented a RESTful API using **Python Flask** and **SQLAlchemy** to synchronize patient records across two distinct healthcare databases.
- Created a command-line interface tool in **Python** to automate data validation checks against **FHIR** resource schemas before data ingestion, reducing validation errors by **45%**.
- Developed interactive dashboards in **Power BI** to visualize synchronization success rates and identify data discrepancies for project stakeholders.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
