PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Executed manual and exploratory tests across multiple features for consumer-facing PC applications, contributing to enhanced product stability.
- Designed, executed, and maintained comprehensive test cases based on software requirements and technical specifications, ensuring thorough validation.
- Participated actively in release validation cycles, performing critical regression testing and smoke tests to confirm build integrity before deployment.
- Clearly documented and reported defects within a bug tracking system, collaborating closely with software engineers to facilitate timely investigation and resolution.
- Contributed to the maintenance of essential test documentation, identifying opportunities to expand test coverage and improve overall quality assurance processes.
- Supported the quality assurance efforts for Windows-based desktop applications, gaining practical experience with platform-specific testing considerations.
- Developed Python scripts to automate repetitive testing tasks, reducing manual effort and increasing the efficiency of regression test cycles by approximately **15%**.

SKILLS

Testing Fundamentals – Manual Testing, Exploratory Testing, Test Case Design, Test Execution, Regression Testing, Smoke Testing, Defect Reporting, Test Documentation, Quality Assurance

Operating Systems – Windows Desktop Applications, Linux

Scripting & Automation – Python

Tools & Methodologies – Jira, Confluence, Agile, Scrum

Cloud & CI/CD – AWS, Jenkins, Git, Docker

PROJECTS

Windows Application Test Suite Enhancement

- Developed a Python-based framework to automate a subset of manual test cases for a desktop application, increasing test execution speed by **20%**.
- Designed and implemented comprehensive test cases covering core functionalities and edge cases, directly addressing requirements for new feature releases.
- Collaborated with development teams to triage and resolve identified defects, ensuring a higher quality release candidate through iterative testing.

Automated Build Validation Scripts

- Created Python scripts to automate the validation of build artifacts deployed to staging environments, catching configuration errors before manual QA.
- Integrated automated checks into the **Jenkins** CI/CD pipeline, providing faster feedback loops to developers on build stability.
- Documented the usage and maintenance procedures for the automation scripts, enabling other team members to leverage the tooling effectively.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
