PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Analysed customer behaviour and loyalty program performance to identify opportunities for increasing customer retention and lifetime value across retail categories, leading to targeted CRM campaigns.
- Supported business teams by identifying trends and segment attributes associated with customer groups for specific categories, brands, and ranges, informing priority customer segments for loyalty targeting.
- Partnered with retail operations teams to monitor CRM and loyalty program performance, tracking customer acquisition and value growth against return on investment targets.
- Advised on key performance indicator (KPI) goals for distinct customer segments and established tracking mechanisms to monitor business performance, identifying root causes for deviations from goals.
- Critiqued the potential impact of new marketing campaigns on customer uptake, retention rates, and overall customer value growth, providing data-backed projections.
- Identified and prioritised improvement actions and corrective measures based on customer growth targets and observed behaviour patterns, aligning with strategic business objectives.
- Developed and maintained **Power BI** dashboards that transformed raw transactional and loyalty data into consumable and actionable business insights for senior management and category teams.

SKILLS

Analytics & BI Tools – Power BI, Tableau, DAX, Power Query, QlikView

Data Analysis & Modelling – Customer Segmentation, Cohort Analysis, Regression Analysis, A/B Testing, Time-Series Analysis, Statistical Methods

Programming & Scripting – Python, R, SQL, pandas, NumPy, scikit-learn

CRM & Loyalty Systems – Customer Data Analysis, Campaign Performance Tracking, ROI Calculation, Customer Retention Strategies, Customer Value Growth

Retail & E-commerce Data – EPOS Data, Loyalty App Data, Third-Party Market Data, Customer Attributes, Offer Targeting

PROJECTS

Customer Segmentation and Loyalty Insights Dashboard

- Developed a comprehensive customer segmentation model using **Python** and **scikit-learn** based on transaction history and loyalty program engagement data from a retail client.
- Built an interactive **Power BI** dashboard to visualise customer segments, analyse cohort behaviour, and track key loyalty metrics, enabling business stakeholders to understand customer value drivers.
- Presented findings and actionable recommendations on targeted marketing strategies for specific customer segments to business analysts and marketing teams, resulting in a **15%** uplift in campaign engagement for a pilot promotion.

Retail Campaign Performance Analysis and ROI Measurement

- Analysed historical marketing campaign data, including voucher and incentive investments, using **SQL** queries against enterprise databases to calculate campaign uplifts and measure return on investment.
- Designed and implemented analytical frameworks to assess the financial and customer impact of implemented incentives and loyalty plans, identifying key drivers of success and areas for optimisation.
- Collaborated with marketing specialists to forecast the impact of proposed campaigns on customer uptake and retention, providing data-driven insights to refine targeting strategies.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
