PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** REST APIs for internal microservices, handling approximately 1,500 requests per minute during peak hours.
- Implemented robust data validation and error handling within **Java** services, reducing critical production defects by **18%** over a six-month period.
- Refactored complex relational database queries in **SQL** across PostgreSQL and Oracle, improving data retrieval performance for key operational reports by an average of **22%**.
- Collaborated with senior engineers to review code for new feature development in **Java**, ensuring adherence to coding standards and improving overall code quality.
- Designed and executed load flow studies using network simulation tools to validate system output against recorded measurements, identifying and resolving discrepancies.
- Analyzed load flow results to pinpoint areas for network optimization and troubleshoot reported system issues, contributing to improved network reliability.
- Containerized backend Java services using **Docker** and deployed them to **AWS EC2** instances managed via Jenkins pipelines.

SKILLS

Languages – Java, Python, SQL, R

Frameworks/Libraries – Spring Boot, pandas, NumPy, scikit-learn

Databases – PostgreSQL, MySQL, Oracle

Cloud/DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Tools – Power BI, Tableau, Splunk, Dynatrace, Jira, Confluence

Domain – Power Systems Analysis, Network Verification, Data Analytics, ETL, Production Support

PROJECTS

Network Load Flow Analysis Tool (HCL Technologies)

- Developed a Python script to automate the parsing of network topology data from GIS extracts and input it into power flow simulation software.
- Integrated weather data feeds to analyze the impact of meteorological conditions on load profiles and network performance.
- Generated summary reports of power flow study results, highlighting key parameters and potential areas of concern for operational review.

Enterprise Data Integration Pipeline (HCL Technologies)

- Engineered Python ETL pipelines to extract, transform, and load data from SAP and RMDS systems into a central data warehouse.
- Wrote complex SQL queries to validate data integrity and perform reconciliation checks between source systems and the data warehouse.
- Built automated reporting mechanisms using pandas to provide stakeholders with key performance indicators on data flow status and quality.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
