## PROFESSIONAL EXPERIENCE

### Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot REST APIs** for internal services, handling approximately 500 requests per second during peak loads.
- Implemented robust error handling and logging mechanisms using **Spring Boot Actuator** and **Logback**, reducing critical incident resolution time by 18%.
- Designed and implemented data persistence layers using **Hibernate** and **JPA** with PostgreSQL, ensuring data integrity across multiple modules.
- Managed and optimized **MariaDB** and **ClickHouse** database systems, including schema design, query tuning, and routine maintenance for high-throughput ad-serving operations.
- Configured and managed **Nginx web servers**, optimizing performance for serving high volumes of ad content and ensuring efficient resource utilization.
- Administered and maintained a large-scale **Linux server infrastructure** (RedHat-based), focusing on stability, performance, and security best practices.
- Containerized backend services using **Docker** and deployed them to an **AWS EC2** environment, streamlining the development and deployment workflow.

## SKILLS

**Languages** – Java, Python, Bash, PHP, Go, SQL

**Frameworks & Libraries** – Spring Boot, Hibernate, JPA, scikit-learn, pandas, NumPy, Nginx, Flask, FastAPI

**Databases** – MariaDB, ClickHouse, PostgreSQL, MySQL, Oracle

**Cloud & Infrastructure** – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, Google Cloud

**Tools & Methodologies** – Git, GitHub, Jenkins, Jira, Confluence, Puppet, Redis, Memcached, Agile, SCRUM, ELK Stack, Nagios

**Networking** – DNS Configuration, VRRP, PXE, Kickstart, IPTables

## PROJECTS

### High-Performance Ad-Serving Backend (HCL Technologies)

- Engineered a **Java Spring Boot** microservice to process and serve ad requests, achieving an average response time of **85ms** under simulated load.
- Integrated **Redis** for caching frequently accessed ad creatives and user targeting data, reducing database load by approximately 40%.
- Developed comprehensive unit and integration tests using **JUnit** and **Mockito**, achieving over **85% code coverage** for critical service components.

### Automated Infrastructure Deployment Pipeline (HCL Technologies)

- Created **Python scripts** to automate the provisioning of server infrastructure on **AWS EC2** instances, reducing manual setup time by 75%.
- Implemented a CI/CD pipeline using **Jenkins** and **Git** for automated builds, testing, and deployment of Java applications, cutting deployment cycles from days to hours.
- Configured **Nginx** as a reverse proxy and load balancer for the deployed applications, ensuring high availability and efficient traffic distribution across instances.

## EDUCATION

### M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

### B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

## CERTIFICATIONS

---

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
