PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **Python** backend services and **REST APIs** for AI agent communications and data exchange, processing approximately **1,500 requests per hour**.
- Implemented real-time **agent monitoring** and **performance tracking** features using **Python**, ensuring data was available for immediate analysis.
- Designed and built interactive frontend components using **React.js** to visualize agent performance data, improving data accessibility for operational teams.
- Contributed to the design and development of microservices that support AI agent communications, focusing on efficient **data exchange**.
- Collaborated with product managers and designers within an **agile** framework to deliver features iteratively, participating in sprint planning and **code reviews**.
- Explored and integrated **AI tools**, specifically the **OpenAI API**, to enhance SDLC innovation and improve development efficiency.
- Containerized backend applications using **Docker** and deployed them to an **AWS** environment, ensuring consistent and scalable operation.

SKILLS

Backend Development – Python, Java, Spring Boot, Flask, FastAPI, REST APIs, Microservices

Frontend Development – React.js, Angular, HTML, CSS

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes

Databases & Data Handling – SQL, PostgreSQL, MySQL, Oracle, pandas, NumPy

DevOps & CI/CD – Jenkins, Git, Agile, Scrum

AI & ML – OpenAI API, LangChain, Bedrock, scikit-learn

Monitoring & Observability – Splunk, Dynatrace, CloudWatch

PROJECTS

AI Agent Communication Platform

- Engineered **Python** microservices to handle real-time communication and data exchange between AI agents and backend systems, managing over **2,000 messages daily**.
- Developed a **React.js** dashboard for monitoring AI agent status and performance metrics, providing stakeholders with immediate operational insights.
- Integrated the **OpenAI API** to enable advanced natural language processing capabilities within the AI agents, improving response accuracy by an estimated **15%**.

Real-time Agent Performance Monitoring

- Built a scalable **Python** backend to ingest and process real-time performance data from a fleet of 50+ AI agents.
- Designed and implemented a **FastAPI** interface for querying agent performance logs, reducing data retrieval time by **40%**.
- Containerized the monitoring service using **Docker** and deployed it on **AWS Lambda** for efficient, event-driven processing.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
