PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and executed functional and regression test plans for new feature development within a custom development environment, ensuring traceability to requirements.
- Analyzed complex business requirements and acceptance criteria to validate testability and guide acceptance, contributing to a **15% reduction** in requirement ambiguity.
- Created comprehensive and well-defined test scripts for functional, regression, and integration testing, meticulously tracing them back to original requirements.
- Participated in defect triage discussions, actively questioning and refining the perceived severity of issues to ensure accurate prioritization.
- Interrogated underlying databases to extract and validate test data, executing complex **SQL statements** to prove test results and confirm data integrity.
- Supported test management in developing project plans and tracking progress against key milestone dates, ensuring timely delivery of testing phases.
- Containerized backend services using **Docker** and deployed them to a managed **Kubernetes** cluster (EKS), configuring basic resource limits and integrating with **Jenkins** CI/CD pipelines for automated deployments.

SKILLS

Testing Methodologies – Functional Testing, Regression Testing, Integration Testing, API Automation, Backend Testing, Test Planning, Test Execution, Defect Triage, Test Scripting, Acceptance Criteria Analysis

Programming Languages – Java, JavaScript, TypeScript, SQL, Python, Shell Scripting

Tools & Technologies – Cucumber, REST Assured, Serenity, Jenkins, GitLab, Git, Jira, Confluence, Docker, Kubernetes, PostgreSQL, AWS (EC2, S3, Lambda, CloudWatch), Splunk, Dynatrace

Domain Experience – Fintech, Payments Terminal, Device Management Platforms, Cards Processing, Backend Processing Systems

Cloud & CI/CD – AWS, Kubernetes, Docker, Jenkins, GitLab, CI/CD Pipelines

PROJECTS

Backend Payments System Testing Automation

- Developed and maintained automated test scripts using **Java** with **REST Assured** for a backend payments processing system, covering core transaction flows and API integrations.
- Integrated automated test suites into the **Jenkins** CI/CD pipeline, enabling daily regression runs and providing rapid feedback on build stability.
- Extracted and manipulated test data using **SQL** against a **PostgreSQL** database to simulate various transaction scenarios and edge cases.

Device Configuration Service API Testing

- Designed and implemented **TypeScript**-based API tests for a device configuration service, focusing on versioned configurations and parameter updates.
- Executed tests against various backend environments deployed on **Kubernetes**, validating service responses and error handling for different device states.
- Collaborated with development teams to define clear API contracts and acceptance criteria, ensuring test coverage aligned with business logic.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
