PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and implemented multi-agent workflows using **Python** and **Node.js**, orchestrating specialist agents for complex task execution.
- Developed context engineering techniques for LLM interactions, including crafting system prompts and customizing agent skills to manage context windows effectively.
- Built and evaluated AI outputs critically through rapid prototyping and experimentation in a fast-moving AI tooling landscape, focusing on functional outcomes.
- Contributed to open-source initiatives by sharing expertise and adopting a continuous learning approach within a diverse, collaborative team environment.
- Applied software engineering best practices including **TDD**, **CI/CD**, and rigorous **code reviews** to ensure high-quality, maintainable code.
- Consumed and designed APIs for interconnected systems, facilitating data exchange and workflow automation between different service components.
- Containerized applications using **Docker** and deployed them to **AWS EC2** instances, managing configurations and ensuring application stability in production.

SKILLS

Languages – Python, Node.js, Go

AI/ML Concepts – Multi-agent workflows, Orchestrator/Specialist patterns, Context engineering, System prompts, Agent customization, Agent skills, LLM reasoning, Prompt engineering evaluation, Red-teaming prompts

Agentic Frameworks – LangGraph, CrewAI, AutoGen

Software Engineering Practices – TDD, CI/CD, Code reviews

Cloud & Containerization – AWS (EC2, S3, Lambda, CloudWatch), Docker

API Development – REST APIs

PROJECTS

AI-Powered Workflow Orchestration Platform (HCL Technologies)

- Developed a core orchestration engine in **Python** that managed the lifecycle of specialist AI agents, enabling automated task completion for enterprise clients.
- Integrated with external APIs and data sources to provide agents with necessary context, enhancing decision-making and output accuracy for complex workflows.
- Designed a modular agent skill system allowing for dynamic addition of new capabilities, increasing platform adaptability and reducing integration time for new use cases.

Agentic Prompt Evaluation Framework (MSc Applied AI)

- Built a framework using **Python** and **LangGraph** to systematically evaluate LLM responses based on predefined criteria and objective metrics.
- Implemented automated red-teaming prompts to identify potential failure modes and biases in agent reasoning, improving model robustness by approximately **15%**.
- Developed data visualization dashboards in **Power BI** to present evaluation results and performance trends to project stakeholders.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
