PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained Python-based backend services and APIs for enterprise applications, focusing on reliability and scalability within a cloud environment.
- Designed and implemented serverless AWS solutions, including **Lambda** functions and **API Gateway** integrations, to support microservices architecture and event-driven workflows.
- Investigated and resolved complex software defects and performance bottlenecks in production systems, ensuring adherence to service level agreements (SLAs) for critical applications.
- Collaborated with cross-functional teams including product managers and architects to translate business requirements into technical solutions within a cloud-native, serverless paradigm.
- Participated in peer code reviews and pair programming sessions to uphold code quality standards and facilitate knowledge sharing across the engineering team.
- Contributed to the continuous improvement of CI/CD pipelines and development processes, enhancing deployment frequency and system stability.
- Managed and integrated with **NoSQL databases** such as **DynamoDB**, ensuring efficient data storage and retrieval for scalable applications.

SKILLS

Programming Languages – Python, JavaScript, TypeScript

Cloud Services – AWS Lambda, AWS API Gateway, AWS DynamoDB, AWS S3, AWS CloudWatch

Databases – DynamoDB, PostgreSQL, MySQL, Oracle

Development Tools – Git, Jenkins, Jira, Docker

Methodologies – Agile, Scrum, Object-Oriented Design, Clean Code Principles

Infrastructure – Terraform, CloudFormation

Backend Frameworks – FastAPI, Flask, Spring Boot

PROJECTS

Serverless Event Processing System

- Engineered a serverless Python application on **AWS Lambda** to process and route high-volume event streams, handling approximately **2,100 events per second** during peak loads.
- Integrated with **AWS API Gateway** to expose RESTful endpoints for triggering processing functions and managing request/response cycles for downstream services.
- Developed data validation and transformation logic using **Python** and **Pandas** to ensure data integrity before ingestion into a **DynamoDB** data store.

Automated Cloud Infrastructure Deployment

- Built and deployed scalable cloud infrastructure using **Terraform**, defining resources for **AWS Lambda** functions, **API Gateway** configurations, and **DynamoDB** tables.
- Implemented infrastructure-as-code principles to automate the provisioning and management of development, staging, and production environments, reducing manual setup time by **60%**.
- Containerized application components using **Docker** for consistent deployment across different environments, ensuring seamless integration with the CI/CD pipeline.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
