PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Led the development of **Java Spring Boot** microservices for a banking application, implementing **RESTful APIs** to handle transaction data processing.
- Designed and implemented **Hibernate** entities and JPA repositories for efficient data persistence and retrieval from a **PostgreSQL** database.
- Authored **JUnit** tests and utilized **Mockito** for mocking dependencies, ensuring code quality and maintainability for core Java modules.
- Managed cloud infrastructure deployments for banking applications on **AWS** using **Terraform**, adhering to Infrastructure as Code principles.
- Drove improvements in **CI/CD pipelines** using **Jenkins** and **Git**, automating build, test, and deployment processes for faster release cycles.
- Mentored junior engineers on **clean coding standards** and conducted **code reviews** to ensure adherence to architectural guidelines and best practices.
- Containerized backend services using **Docker** and deployed them to **AWS ECS**, managing configurations and resource allocations.

SKILLS

Cloud Platform – AWS (EC2, Lambda, ECS, RDS, S3, IAM)

Infrastructure as Code – Terraform

Programming Languages – Java, JavaScript, TypeScript, Python, SQL

Frameworks & Libraries – Spring Boot, Hibernate, JPA, JUnit, Mockito, React

Databases – PostgreSQL, MySQL, Oracle, RDS

DevOps & CI/CD – Docker, Jenkins, Git, AWS ECS

Application Servers – JBoss/WildFly

PROJECTS

Cloud-Native Banking Application Development

- Developed a **Java Spring Boot** application deployed on **AWS ECS**, serving as a core component for financial transaction processing.
- Implemented data access layers using **Hibernate** and **JPA** against a managed **RDS PostgreSQL** instance, ensuring data integrity and performance.
- Configured and managed the application's infrastructure using **Terraform**, defining resources for compute, database, and networking within the **AWS** environment.

Automated Deployment Pipeline for Financial Services

- Built and maintained **Jenkins CI/CD pipelines** to automate the build, testing, and deployment of **Java** applications to cloud environments.
- Integrated **Docker** for containerization, ensuring consistent environments across development, staging, and production.
- Implemented automated testing strategies within the pipeline using **JUnit**, reducing manual testing effort by approximately **40%**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
