PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Performed in-depth Enhanced Due Diligence (EDD) analyses on high-risk customer accounts and fundraisers, assessing potential financial crime risks including fraud and AML/CFT concerns.
- Gathered and analyzed information from internal systems, open-source intelligence, and third-party data sources to support risk assessments and document investigative conclusions in case management systems.
- Evaluated fundraiser and transactional activity to identify unusual patterns, assess associated risks, and determine appropriate investigative or escalation steps, contributing to platform abuse mitigation.
- Served as an escalation point for sensitive EDD matters, providing subject matter expertise and risk guidance to internal stakeholders including Payments Risk and Legal teams.
- Developed and maintained subject matter expertise in platform-specific risks and financial crime typologies, staying current with evolving industry guidance and emerging threats.
- Collaborated with cross-functional partners to investigate complex cases and mitigate platform abuse, ensuring clear and concise written communication to customers and stakeholders.
- Implemented **Python** scripts to automate data validation and reporting for EDD case reviews, reducing manual processing time by approximately **20%**.

SKILLS

Risk & Compliance – Enhanced Due Diligence (EDD), AML/CFT, Financial Crime, Fraud Detection, Sanctions Screening, Politically Exposed Persons (PEPs)

Investigation & Analysis – Open-Source Intelligence (OSINT), Risk Assessment, Pattern Recognition, Data Analysis, Case Management Systems, Audit Requirements

Core Technologies – SQL, Python, Java, Spring Boot, REST APIs, AWS, Docker, Linux, Git

Data Visualization & BI – Power BI, Tableau, DAX, Power Query, Data Modelling

Tools & Methodologies – Jira, Confluence, Jenkins, Splunk, Dynatrace, Agile/Scrum

PROJECTS

Financial Crime Risk Assessment Framework (HCL Technologies)

- Designed and implemented an investigative framework for assessing high-risk entities, incorporating analysis of organizational structures and operational activity to identify potential risk exposures.
- Developed **Python** scripts to parse and analyze transaction data, identifying unusual patterns and generating alerts for further investigation, which handled approximately **1,500** events per day.
- Documented detailed findings and risk conclusions from investigative reviews in a structured format to support defensible decision-making and internal audit requirements.

Automated Transaction Monitoring Dashboard (HCL Technologies)

- Built and maintained a **Power BI** dashboard for monitoring transaction flows and operational alerting on failed or stuck payment messages, supporting a financial services client.
- Wrote **SQL** queries against PostgreSQL and Oracle databases to extract and validate transaction data for the dashboard, ensuring data accuracy for operational teams.
- Collaborated with business analysts to refine dashboard metrics and reporting requirements, enhancing the visibility of critical operational statuses for a team of 8 analysts.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
