PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and implemented scalable backend services using **Java** and **Spring Boot**, focusing on high-throughput data ingestion pipelines for customer communications.
- Developed and maintained **API interfaces** for integrating with external communication systems, ensuring modularity and reusability across diverse data sources.
- Enhanced **system security** by implementing authentication and authorization protocols for external-facing APIs, mitigating unauthorized access risks.
- Collaborated with internal Product and GTM teams to define feature requirements and technical specifications for new communication capture capabilities.
- Took ownership of features from initial design through to production deployment, ensuring reliability and performance in a live, massive system.
- Containerized backend services using **Docker** and deployed them to **AWS ECS**, managing configurations and ensuring smooth rollouts.
- Refactored existing Java code to improve maintainability and performance, applying **JUnit** and **Mockito** for comprehensive unit testing and validation.

SKILLS

Languages – Java, Python, SQL, Bash

Frameworks & Libraries – Spring Boot, Spring, Hibernate, JPA, JUnit, Mockito, pandas, NumPy, Flask, FastAPI

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch, ECS)

Databases – PostgreSQL, MySQL, Oracle

Tools & Technologies – Docker, Kubernetes, Jenkins, Git, Jira, Confluence, Splunk, Dynatrace, Kafka, SQS

Methodologies – Agile, Scrum, CI/CD

PROJECTS

Scalable Java Backend for Communications Ingestion

- Engineered a **Java Spring Boot** backend service to process and ingest high volumes of customer communication data from various sources (email, calendar, calls).
- Implemented robust **API interfaces** using REST principles to handle data streams from third-party communication platforms, ensuring seamless integration.
- Designed and integrated **database schemas** in PostgreSQL to efficiently store and retrieve communication metadata and content, supporting downstream analytics.

Cloud-Native Data Pipeline for Enterprise Systems

- Developed a **Python** data pipeline on **AWS Lambda** to automate the extraction, transformation, and loading of data from enterprise systems into a data warehouse.
- Containerized pipeline components using **Docker** for consistent deployment across development and production environments on **AWS ECS**.
- Wrote shell scripts for automated job scheduling and log analysis within the Linux environment, ensuring pipeline operational health.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
