PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Advised enterprise customers on modernization strategies, assessing legacy application environments and recommending phased roadmaps for migration to cloud infrastructure.
- Developed and delivered technical presentations on cloud infrastructure and application modernization best practices to customer engineering teams and business stakeholders.
- Designed and prototyped integrations for customers using Google Cloud Platform services, demonstrating how to leverage cloud capabilities for their specific business needs.
- Collaborated with product management to prioritize solutions impacting customer adoption, advocating for feature enhancements based on customer feedback and technical blockers.
- Engineered Python scripts to automate data ingestion and ETL processes for operational reporting, reducing manual effort by approximately 40% for the finance operations team.
- Managed production support for enterprise Java and .NET applications, responding to P1/P2 incidents and ensuring adherence to strict SLAs within a regulated financial services environment.
- Containerized Java Spring Boot microservices using Docker for deployment onto AWS EC2 instances, improving deployment consistency and reducing environment setup time by 30%.

SKILLS

Cloud Infrastructure – Google Cloud Platform, AWS, EC2, S3, Lambda, CloudWatch

Containerization & Orchestration – Docker, Kubernetes

Programming Languages – Python, Java, SQL

Backend Development – Spring Boot, REST APIs, Microservices

Databases – PostgreSQL, MySQL, Oracle, NoSQL

CI/CD & Version Control – Jenkins, Git

Operating Systems & Scripting – Linux, Shell Scripting

PROJECTS

Cloud Migration Strategy for Enterprise Applications

- Architected a phased migration plan for a suite of legacy enterprise applications to Google Cloud Platform, focusing on infrastructure modernization and scalability.
- Developed technical proposals and solution blueprints outlining integration strategies and recommended platform architectures for cloud-native environments.
- Conducted workshops with customer technical leads to assess existing infrastructure, identify migration blockers, and define a prioritized roadmap for adoption.

Automated Reporting Pipeline with Python and AWS

- Built a Python-based data pipeline to extract, transform, and load data from multiple PostgreSQL databases into an S3 data lake for downstream analytics.
- Scheduled and monitored pipeline execution using AWS Lambda and CloudWatch, ensuring reliable data delivery for daily operational reports.
- Implemented data validation checks within the pipeline to maintain data integrity, reducing data-related discrepancies in reports by an estimated 15%.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
