PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and implemented **Java Spring Boot** microservices for a **Google Cloud-based platform**, contributing to the GCE Node organization's core functionality.
- Participated in code reviews for **Java** and **Python** components, ensuring adherence to coding standards and improving overall code quality and maintainability.
- Collaborated with product managers to translate requirements into technical specifications for new software features and enhancements within the **GCE ecosystem**.
- Troubleshoot and debugged production issues across distributed systems, providing timely resolutions to maintain application stability and performance.
- Contributed to the architectural design discussions for evolving **cloud-based systems**, focusing on scalability and efficiency.
- Scripted **Python** automation tasks for data processing and system monitoring, reducing manual effort by approximately **15%** for routine operations.
- Containerized applications using **Docker** and managed deployments within **Kubernetes** environments, improving deployment consistency and rollback capabilities.

SKILLS

Languages – Java, Python, C++, Go

Cloud Platforms – Google Cloud Platform, AWS

Core Technologies – Kubernetes, Docker, SQL

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn

Development Practices – Agile, Scrum, CI/CD, Code Reviews

Tools – Git, Jenkins, Jira, Confluence, Splunk, Dynatrace

PROJECTS

Distributed Systems for Fleet Management (HCL Technologies)

- Designed and developed **Java Spring Boot** REST APIs to manage device configurations and status updates for a fleet of 5,000+ nodes.
- Implemented asynchronous message processing using **Kafka** for event-driven updates across distributed services, handling approximately **2,000 messages per second** during peak load.
- Wrote comprehensive unit tests using **JUnit** and Mockito, achieving over **85% code coverage** for critical service components.

Automated Data Ingestion Pipeline (HCL Technologies)

- Engineered a **Python**-based ETL pipeline to ingest and transform data from multiple sources into a central data warehouse, processing over **1TB of data** weekly.
- Developed data validation scripts using **pandas** and SQL to ensure data integrity and consistency before loading into the warehouse, identifying and correcting **~5%** of data anomalies.
- Automated the pipeline execution using **Jenkins** CI/CD jobs, enabling scheduled daily data refreshes and reducing manual intervention by **10 hours per week**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
