PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Diagnosed and resolved **data center blockers** and stakeholder concerns, achieving swift resolution for critical operational issues.
- Designed and iterated on internal **software and automated frameworks** to streamline the issue management life-cycle for server operations.
- Created standardized **technical playbooks and processes**, enabling the Google Server Operations team to manage and resolve issues autonomously.
- Partnered with **Engineering and Server Operations** stakeholders to identify and fix the fundamental root causes of negative business outcomes, improving system reliability.
- Managed project schedules and timelines for internal tooling initiatives, ensuring engagement with cross-functional partners.
- Developed backend applications using **Python and Shell scripting** to automate workflows and improve operational efficiency within data center environments.
- Containerized applications using **Docker** and deployed them to cloud infrastructure, ensuring consistent environments and simplifying management.

SKILLS

Cloud Computing – Google Cloud Platform, AWS, EC2, S3, Lambda, CloudWatch

Programming Languages – Python, Java, Shell, C++, JavaScript

Web Technologies – REST APIs, Spring Boot, Node.js, NestJS

Databases – PostgreSQL, Oracle, MySQL, Kubernetes

Tools & Methodologies – Jenkins, Git, Jira, Confluence, Agile, Scrum, Docker, SAP

PROJECTS

Data Center Operations Automation Framework

- Developed a **Python-based framework** to automate the diagnosis and resolution of common data center operational blockers, reducing manual intervention time by approximately 40%.
- Integrated the framework with **Splunk and Dynatrace** to ingest logs and metrics, enabling proactive issue identification and faster root cause analysis.
- Created reusable **automation scripts and playbooks** that were adopted by the server operations team for routine troubleshooting tasks.

Internal Tooling for Issue Triage and Management

- Engineered a **Java Spring Boot application** to serve as a centralized dashboard for tracking and triaging technical issues across multiple backend systems.
- Implemented REST APIs for seamless integration with **Jira and Confluence**, facilitating automated ticket creation and knowledge base updates.
- Designed and implemented a **PostgreSQL database schema** to store issue-related data, supporting detailed reporting and historical analysis.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
