## PROFESSIONAL EXPERIENCE

### Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** REST APIs for backend services, handling approximately 500 requests per second during peak loads.
- Implemented data persistence logic using **Hibernate** and **JPA**, managing complex object-relational mappings for enterprise data models.
- Designed and executed unit tests with **JUnit** and **Mockito**, achieving over 90% code coverage for critical application modules.
- Collaborated with engineering teams to troubleshoot and resolve production issues on **Google Kubernetes Engine** deployments, improving system availability.
- Assisted customers in debugging workload issues across large-scale, multi-node environments on **Google Cloud Platform**, reducing Mean Time To Resolution by 15%.
- Participated in code reviews for new feature development, ensuring adherence to coding standards and best practices for maintainability.
- Containerized applications using **Docker** and deployed them to **Kubernetes** clusters, managing configurations and basic resource allocation.

## SKILLS

**Cloud Platform** – Google Cloud Platform, GKE, Anthos, Compute Engine, Kubernetes, Docker

**Languages** – Java, Python, SQL, Shell Scripting

**Frameworks & Libraries** – Spring Boot, Hibernate, JPA, JUnit, Mockito, pandas, NumPy

**Tools & Technologies** – Jenkins, Git, Jira, Confluence, Splunk, Dynatrace, PostgreSQL, MySQL, Oracle

**Networking & Web** – TCP/IP, HTTP, DNS, Load Balancing

**Operating Systems** – Linux

## PROJECTS

### Kubernetes-Native Java Application Deployment

- Containerized a **Java Spring Boot** microservice using **Docker** and deployed it to a **Kubernetes** cluster (GKE), configuring deployments, services, and ingress.
- Developed a CI/CD pipeline using **Jenkins** to automate build, test, and deployment processes, reducing manual deployment time by 40%.
- Implemented health checks and readiness probes within the Kubernetes deployment to ensure application availability and facilitate automated scaling.

### Customer Cloud Infrastructure Troubleshooting Simulation

- Simulated troubleshooting scenarios for customer applications running on **Google Cloud Platform**, focusing on network connectivity and application performance issues.
- Analyzed application logs and system metrics using simulated tools to identify root causes of performance degradation and availability problems.
- Developed shell scripts to automate log analysis and data collection for faster diagnosis in simulated customer environments.

## EDUCATION

### M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

### B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

## CERTIFICATIONS

---

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
