PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed **Java Spring Boot** microservices, implementing RESTful APIs for cross-service communication and data exchange, handling approximately **1,500 requests per minute** during peak loads.
- Engineered **Python ETL pipelines** to automate data ingestion and transformation processes from disparate sources, reducing manual processing time by **40%** for recurring reporting tasks.
- Designed and implemented **Hibernate** entities and queries for a core enterprise application, optimizing data persistence layer performance and ensuring data integrity across critical business workflows.
- Managed production incidents for enterprise applications using **Splunk** and **Dynatrace**, coordinating root cause analysis and implementing fixes to meet stringent service level agreements for a financial services client.
- Collaborated with business analysts to gather requirements for enhancements to an **operations dashboard**, translating needs into technical specifications for transaction monitoring and alerting features.
- Containerized a **Java Spring Boot** application using **Docker**, defining build and runtime configurations for deployment onto an **AWS EC2** instance.
- Supported and integrated with enterprise business systems, including **ERP** modules, coordinating change control processes for system configuration updates and UAT.

SKILLS

Languages – Java, Python, SQL, R

Frameworks/Libraries – Spring Boot, Hibernate, pandas, NumPy, scikit-learn, Flask, FastAPI

Cloud/DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, Linux

Databases – PostgreSQL, MySQL, Oracle

BI/Analytics – Power BI, Tableau, DAX, Power Query, RStudio

Tools/Methodologies – Jira, Confluence, Agile, Scrum, REST APIs, CI/CD

PROJECTS

Automated Financial Transaction Monitoring System

- Developed a **Java Spring Boot** application to ingest and process financial transaction data streams, identifying and flagging anomalies in near real-time.
- Implemented robust error handling and retry mechanisms for message processing, ensuring the system maintained high availability for critical operational alerts.
- Integrated with a **PostgreSQL** database to store transaction metadata and alert logs, enabling detailed historical analysis and audit trails.

Customer Operations Dashboard Enhancements

- Enhanced an internal **operations dashboard** by developing **Python** scripts to aggregate data from multiple microservices and operational logs, providing consolidated views for support teams.
- Built custom **Power BI** reports and visualizations to present key performance indicators related to transaction processing and system health, improving stakeholder visibility.
- Collaborated with operations teams to refine alert logic and reporting requirements, directly incorporating feedback to increase the actionable nature of the dashboard outputs.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
