PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Managed production incident response for enterprise applications, resolving an average of **15 P1/P2 incidents per month** using Splunk and Dynatrace for root cause analysis and SLA adherence.
- Developed **Python automation scripts** to streamline ETL processes, reducing manual data processing time by approximately **30%** for scheduled financial reports.
- Executed complex **SQL queries** across PostgreSQL and Oracle databases for data validation and ad-hoc reporting, supporting critical reconciliation workflows.
- Contributed to feature development for a **Java Spring Boot**-based payments operations dashboard, implementing REST APIs for enhanced transaction monitoring.
- Containerized multiple Java applications using **Docker**, facilitating consistent deployment across development and production environments on AWS EC2.
- Collaborated with cross-functional teams to analyze requirements and coordinate User Acceptance Testing for enterprise system configuration changes.
- Maintained detailed technical documentation and operational runbooks for production systems, improving knowledge transfer for incident triage and resolution.

SKILLS

Languages – Java, Python, SQL, Bash

Frameworks/Libraries – Spring Boot, Hibernate, Spring Data JPA, pandas, NumPy, scikit-learn, FastAPI

Cloud/DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Databases – PostgreSQL, MySQL, Oracle

Monitoring/Observability – Splunk, Dynatrace, CloudWatch

Tools/Methodologies – Jira, Confluence, Agile, Scrum, REST APIs, CI/CD

PROJECTS

Enterprise Java Application Support & Modernization

- Provided 24/7 production support for a suite of **Java** applications, troubleshooting and resolving an average of **18 critical incidents** monthly, ensuring adherence to strict SLAs.
- Refactored legacy Java code sections using **Spring Data JPA** and optimized database interactions, resulting in a **20% reduction** in average API response times for core transaction processing modules.
- Developed and maintained **JUnit** test suites for new feature implementations, increasing code coverage by **15%** and reducing post-deployment defects.

Python-based Financial Transaction Reporting Automation

- Engineered a **Python**-based data pipeline to automate the generation of daily financial transaction reconciliation reports, processing approximately **50,000 records** per run.
- Integrated **pandas** and SQL queries to extract, transform, and load data from PostgreSQL into a reporting data mart, improving data accuracy for downstream analysis.
- Implemented scheduled execution of the reporting script using cron jobs on a Linux server, ensuring timely delivery of critical operational metrics to business stakeholders.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
