PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and implemented automated data validation scripts in **Python** to verify the integrity of incoming transaction records, reducing manual review time by **~40%** for the operations team.
- Developed and maintained **Java Spring Boot** REST APIs for internal services, facilitating data exchange and supporting critical backend functionalities for enterprise applications.
- Managed production incidents for enterprise applications, performing root cause analysis and implementing fixes within strict SLAs, contributing to a **98%** incident resolution rate within the target timeframe.
- Refactored inefficient relational database queries and implemented strategic indexing across **PostgreSQL** and **MySQL** databases, improving report generation times by an average of **30%**.
- Contributed to CI/CD pipeline improvements using **Jenkins** and **Git**, enabling more frequent and reliable deployments of new features and bug fixes.
- Wrote comprehensive technical documentation for system integrations and operational procedures, which became a primary reference for junior support engineers and reduced onboarding time by **~15%**.
- Containerized several backend Java services using **Docker** and deployed them to **AWS EC2** instances, improving application portability and simplifying environment management.

SKILLS

Languages – Java, Python, SQL, R, HTML, CSS

Frameworks/Libraries – Spring Boot, Hibernate, JPA, pandas, NumPy, scikit-learn, Flask, FastAPI, React, Angular

Databases – PostgreSQL, MySQL, Oracle

Cloud/DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, Linux

BI/Analytics – Power BI, Tableau, DAX, Power Query, RStudio

Methodologies – Agile, Scrum

PROJECTS

Automated Transaction Reconciliation System (HCL Technologies)

- Developed a **Python**-based ETL process to extract, transform, and load transaction data from disparate sources into a central data warehouse.
- Implemented automated reconciliation checks using **SQL** queries across **PostgreSQL** and **Oracle** databases, identifying and flagging discrepancies in **~99%** of processed records.
- Created operational dashboards in **Power BI** to visualize reconciliation status and highlight key metrics for the financial services client's operations team.

Internal Java Microservice Performance Optimization

- Engineered a **Java Spring Boot** microservice to process high-volume data streams, implementing efficient error handling and retry mechanisms.
- Optimized database interactions by refactoring **JPA** queries and implementing connection pooling, reducing average response time by **22%**.
- Containerized the microservice using **Docker** and deployed it on **AWS EC2**, ensuring consistent performance and easier scalability.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
