PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and deployed **end-to-end AI-powered automation workflows** for lead generation, processing approximately **5,000 leads per week**.
- Developed Python scripts to **extract, process, and structure data** from online sources, integrating with **CRM platforms** for seamless synchronization.
- Implemented data cleaning processes including **deduplication, enrichment, and prioritization** of leads, improving data accuracy by an estimated **15%**.
- Built and maintained scalable **data pipelines** that convert raw inputs into actionable insights, handling a daily volume of over **10,000 records**.
- Developed web scraping solutions to gather data from **dynamic platforms**, effectively managing rate limits and session behaviors.
- Engineered document processing pipelines using **OCR and parsing tools** for both scanned and digital PDF extraction, reducing manual effort by **40%**.
- Containerized automation services with **Docker** and deployed them to **AWS EC2 instances**, ensuring scalability and reliability.

SKILLS

AI & Automation – AI Automation, Workflow Automation, Web Scraping, OCR, Document Parsing, CRM Integration, Data Extraction, Data Processing, Data Structuring, Lead Generation

Programming & Scripting – Python, Bash Scripting

Data Engineering – Data Pipelines, ETL, Data Cleaning, Deduplication, Data Enrichment, Data Prioritization, Structured Data Processing

Cloud & DevOps – AWS, EC2, Docker, CI/CD

Databases & Integration – SQL, REST APIs, CRM Platforms

PROJECTS

Automated Lead Generation System

- Developed a Python-based system to automate lead generation from multiple online sources, including building custom web scrapers to handle diverse website structures.
- Implemented **data extraction and structuring logic**, transforming raw scraped data into a clean, CRM-ready format with deduplication and enrichment capabilities.
- Integrated the system with a **CRM platform via REST APIs**, enabling seamless data synchronization and providing end-to-end pipeline visibility for sales operations.

Document Processing and Data Extraction Pipeline

- Engineered a Python pipeline to process both scanned documents (using **OCR**) and digital PDFs, extracting key information for client acquisition workflows.
- Implemented **data parsing and normalization** techniques to ensure consistency and accuracy of extracted fields, reducing manual data entry by approximately **35%**.
- Automated the output of structured data into a format compatible with internal databases and reporting tools, supporting efficient client data management.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
