PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and implemented **AI-native interfaces** for internal dashboards and developer platforms, integrating **LangChain** and **LLM tooling** to enhance workflow automation.
- Developed and maintained **evaluation frameworks** for AI systems, including instrumentation and feedback loops to measure task quality and reliability for agent skills, achieving a **15% improvement** in predicted task success rates.
- Built reusable infrastructure for AI integration across applications, focusing on **Edge Functions** and **embeddings**, centralizing shared logic and reducing duplication across services.
- Engineered **Python scripts** for automating data ingestion and ETL processes, supporting the creation of datasets for AI model experimentation and analysis.
- Collaborated with **cross-functional teams** including documentation and frontend engineers to deliver cohesive developer experiences for AI tooling.
- Containerized **AI tooling services** using Docker and deployed them to a Kubernetes cluster, ensuring reliable scaling and deployment through CI/CD pipelines.
- Wrote and maintained **production runbooks** and diagnostic scripts for AI services, directly contributing to a **20% reduction** in P1 incident resolution time.

SKILLS

Languages & Frameworks – JavaScript, TypeScript, Python, Node.js, NestJS, React, Angular, Java, Spring Boot

AI & ML – LLM tooling, Agent architectures, Embeddings, Vector Databases, pgvector, LangChain, RAG, Prompt Engineering, Model Evaluation Frameworks, AI Systems

Databases – PostgreSQL, MySQL, Oracle

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, Jenkins, Git, CI/CD

Tools & Methodologies – Jira, Confluence, Agile, Scrum, API Design, REST APIs

PROJECTS

AI Agent Skill Development Platform

- Designed and built a platform for defining and managing AI agent skills, utilizing **TypeScript** and **NestJS** for the backend API.
- Integrated **PostgreSQL** with **pgvector** to store and query embeddings for skill retrieval, enabling context-aware agent responses.
- Developed a **feedback loop** mechanism to collect performance data on agent skills, feeding into an evaluation framework to identify areas for improvement.

Developer Tooling for LLM Integration

- Created **Python scripts** to automate the generation of documentation summaries suitable for ingestion by LLM-based tools.
- Implemented a **FastAPI**-based service to expose curated product knowledge and documentation structures to AI agents.
- Built reusable patterns for interacting with external LLM APIs, including error handling and response parsing for internal developer tools.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
