PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Architected and developed **Java Spring Boot** REST APIs for cross-service data exchange, incorporating request validation and circuit-breaker patterns to ensure high availability.
- Designed and implemented **Hibernate** mappings and performed complex **SQL** queries to manage persistence for enterprise data models, supporting critical backend operations.
- Developed **JUnit** and **Mockito** test suites for Java components, achieving over **85% code coverage** and significantly reducing post-deployment defects.
- Managed data integration from disparate sources, implementing processes to **extract, transform, and distribute** data across multiple data stores, fulfilling client requirements.
- Provided complex **data analysis** and problem-solving expertise to develop **business intelligence** integration designs for key client systems.
- Collaborated with **cross-functional teams** including Product Management and System Admin Teams to integrate and deploy software components across distributed environments.
- Containerised backend services using **Docker** and deployed to **AWS EC2** instances, managing configuration and monitoring through **CloudWatch**.

SKILLS

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch), Docker

Backend Development – Java, Spring Boot, Hibernate, JPA, REST APIs, JUnit, Mockito, Maven

Data Engineering & Warehousing – SQL, PostgreSQL, MySQL, Oracle, Data Modeling, Data Lake, AWS Glue, Apache Airflow, EMR, Spark, PySpark, S3, Parquet, ORC, Avro, Delta Lake, Iceberg, Athena, RDS

CI/CD & DevOps – Jenkins, Git, Artifactory, YAML, Infrastructure as Code (IaC), Terraform, CloudFormation

Programming Languages – Java, Python, SQL, Scala

Tools & Methodologies – Agile, Scrum, Jira, Confluence, Splunk, Dynatrace, GitHub Copilot

PROJECTS

Scalable Data Ingestion and Processing Pipeline

- Developed a **Python**-based data pipeline on **AWS Lambda** and **S3** to ingest and process streaming data, handling approximately **3,500 events/sec** during peak hours.
- Implemented data transformation logic using **Pandas** and **PySpark** to clean and structure raw data from various file formats including **Parquet** and **Avro**.
- Integrated the pipeline with **Apache Airflow** for workflow orchestration and scheduling, ensuring reliable and timely data distribution to downstream analytical systems.

Enterprise Java Microservice for Transaction Reconciliation

- Built a **Java Spring Boot** microservice to automate transaction reconciliation workflows, processing over **5,000 records** daily.
- Designed and implemented **JPA** entities and **Hibernate** mappings for interaction with a **PostgreSQL** database, ensuring data integrity.
- Developed **RESTful APIs** for seamless integration with existing enterprise systems, facilitating data exchange and operational visibility.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
