## PROFESSIONAL EXPERIENCE

### Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and developed **Java Spring Boot microservices** for trade processing, implementing RESTful APIs and ensuring synchronous operation with core systems.
- Authored **Hibernate/JPA persistence layer** configurations and queries to manage trade data entities, optimizing data retrieval for downstream processing.
- Implemented **JUnit and Mockito unit tests** for Java components, achieving over **90% code coverage** for critical business logic and ensuring code hygiene.
- Contributed to **code reviews** for peer engineers, identifying potential issues and promoting adherence to architectural standards within the agile team.
- Participated in **technical estimation** for upcoming sprints, breaking down complex features into manageable tasks and assessing development effort.
- Developed **Java Messaging System (JMS) consumers** to process trade settlement events, integrating with Kafka for asynchronous message handling and ensuring reliable event delivery.
- Containerized trade processing applications using **Docker** and deployed them to an **AWS EKS cluster**, configuring basic resource limits and ensuring smooth rollout.

## SKILLS

**Languages** – Java, SQL, Python, R

**Frameworks/Libraries** – Spring Boot, Hibernate, JPA, JUnit, Mockito, pandas, NumPy, scikit-learn, Kafka, Java Messaging System (JMS)

**Databases** – Oracle, PostgreSQL, MongoDB

**Cloud/DevOps** – AWS, Docker, Kubernetes (EKS), Jenkins, Git

**Methodologies** – Agile, Scrum, CI/CD, Microservices Architecture

**Tools** – Jira, Confluence, Splunk, Dynatrace

## PROJECTS

### Java Trade Processing Service Enhancement

- Engineered a **Java Spring Boot microservice** to handle trade settlement confirmations, integrating with Kafka to ingest real-time event streams.
- Implemented **JPA entities and repositories** for persisting trade data in **PostgreSQL**, ensuring data integrity and efficient querying for reporting.
- Developed robust error handling and retry mechanisms for message processing, reducing message reprocessing incidents by **40%**.

### Cloud-Native Trade Data Ingestion Pipeline

- Built a **Python-based ETL pipeline** to extract, transform, and load trade data from disparate sources into a centralized data lake on **AWS S3**.
- Containerized the pipeline components using **Docker** and orchestrated their execution via **AWS Lambda** triggered by S3 event notifications, improving data freshness.
- Wrote **SQL scripts** for data validation and schema mapping, ensuring consistency and accuracy of ingested trade records.

## EDUCATION

**M.Sc. Data Analytics — National College of Ireland, Dublin**

Feb 2026

**B.E. Computer Science — SNS College of Technology, Coimbatore, India**

2021

## CERTIFICATIONS

---

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
