PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and implemented secure authentication flows using **IAM**, **OIDC**, and **SAML** for enterprise applications, integrating with cloud identity providers.
- Developed and deployed secure, production-ready code for cloud-native applications on **AWS**, adhering to secure coding practices and performing thorough code reviews for team members.
- Executed threat modeling exercises for multiple applications, including those interacting with internal networks, to identify and mitigate potential security vulnerabilities.
- Collaborated with product stakeholders and business leaders to understand evolving security needs and recommend technical modifications to address identified vulnerabilities.
- Conducted discovery and vulnerability assessments on organizational assets, identifying and reporting on security weaknesses, and developing remediation strategies.
- Contributed to the development of security protocols by staying abreast of industry insights and governmental regulations, designing processes to measure control effectiveness.
- Containerized applications using **Docker** and managed deployments on **AWS EC2** instances, ensuring secure configurations and resource isolation.

SKILLS

Cloud Platforms – AWS, EC2, S3, Lambda, CloudWatch, IAM, OIDC, SAML

Development Languages – Python, Java, Spring Boot, SQL

Security Concepts – Authentication, Authorization, Threat Modeling, Vulnerability Assessment, Penetration Testing, IAM, OIDC, SAML

DevOps & IaC – Docker, Jenkins, Git, Terraform, CloudFormation

Data & Analytics – Redshift, Lake Formation, Snowflake, Databricks

PROJECTS

Secure Cloud Authentication Service (HCL Technologies)

- Developed a Python-based microservice for secure user authentication and authorization, integrating with **AWS IAM** and supporting **OIDC** flows.
- Implemented robust error handling and logging mechanisms, ensuring audit defensibility and enabling rapid triaging of security-related incidents.
- Containerized the service using **Docker** and deployed it on **AWS Lambda**, achieving efficient scaling for fluctuating authentication request volumes.

API Security Hardening Framework (HCL Technologies)

- Engineered a framework using Python and **FastAPI** to enforce security best practices for internal REST APIs, including input validation and rate limiting.
- Integrated security scanning tools into the **Jenkins** CI/CD pipeline to automatically detect common vulnerabilities (e.g., OWASP Top 10) before deployment.
- Documented security guidelines and conducted knowledge-sharing sessions for development teams on secure API design patterns.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
