PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and implemented **Java Spring Boot** microservices for data integration, adhering to API standards and ensuring cross-service communication.
- Developed and optimized **Hibernate** queries and data access objects for a high-volume enterprise application, improving data retrieval performance by **18%**.
- Engineered **JUnit** test suites and implemented mocking strategies for complex Java components, increasing code coverage by **22%** and reducing post-deployment defects.
- Managed data integration and analysis of disparate systems, building extensible **data acquisition and integration solutions** to meet functional and non-functional requirements.
- Implemented processes and logic to extract, transform, and distribute data across multiple data stores, supporting **business intelligence integration designs**.
- Collaborated with remote and geographically distributed teams to build and deploy software components, ensuring they were consumable by other products easily.
- Containerized backend services using **Docker** and deployed them to **AWS EKS**, configuring basic resource limits and enabling streamlined CI/CD pipelines.

SKILLS

Cloud Platforms – AWS, EC2, S3, Lambda, CloudWatch, EMR, AWS Glue, Databricks, RDS

Data Technologies – Spark, PySpark, Scala, Apache Airflow, SQL, Oracle, NoSQL, DynamoDB, Delta Tables, Parquet, ORC, Avro

Programming Languages – Java, Python, Scala

Frameworks & APIs – Spring Boot, Hibernate, JPA, REST APIs

DevOps & CI/CD – Jenkins, Git, Artifactory, Yaml, Maven, Terraform, CloudFormation

Big Data Tools – Databricks, Athena

PROJECTS

Enterprise Data Integration Platform Enhancement

- Developed **Java Spring Boot** services to ingest and process data from diverse sources including **Parquet** and **Avro** files, supporting the firm's data warehousing strategy.
- Integrated data pipelines using **Apache Airflow** to orchestrate complex ETL workflows, transforming and loading data into a central **AWS S3** data lake.
- Wrote production runbooks and deployment scripts using **Terraform**, reducing manual deployment effort for new data pipelines by **40%**.

Scalable Data Acquisition Service

- Built an extensible **Python**-based data acquisition service on **AWS Lambda** to handle near real-time data ingestion from various APIs and message queues.
- Optimized data transformation logic using **PySpark** on **Databricks**, processing over **10 TB** of historical data and improving query performance for downstream analytics.
- Implemented **REST API** endpoints for data access, enabling internal product teams to consume integrated data sets efficiently.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
