PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and developed **Java Spring Boot** RESTful APIs for internal microservices, handling request validation and implementing circuit-breaker patterns to improve inter-service communication resilience.
- Engineered efficient **Hibernate** queries and managed ORM mappings for a data-intensive financial reporting module, ensuring data integrity across complex relational schemas.
- Wrote comprehensive **JUnit** and **Mockito** tests for Java components, achieving over **85% code coverage** for critical business logic and reducing post-deployment defects.
- Contributed to the design and architecture of new application features, producing detailed design artifacts and collaborating with senior engineers to ensure adherence to technical constraints.
- Participated in code reviews and technical estimation sessions within an **Agile Scrum** framework, mentoring junior developers on best practices for secure and scalable code development.
- Gained practical experience with **AWS cloud native** services, including deploying and managing applications on **EC2** instances and utilizing **S3** for data storage.
- Containerized microservices using **Docker** and managed deployments through **Jenkins** CI/CD pipelines, facilitating automated builds, testing, and releases.

SKILLS

Backend Development – Java, Spring Boot, Hibernate, JPA, REST APIs, Microservices, JUnit, Mockito, Maven, Gradle

Cloud & DevOps – AWS, EC2, S3, Lambda, CloudWatch, Docker, Jenkins, CI/CD, Git

Databases – SQL, PostgreSQL, MySQL, Oracle

Scripting & Automation – Python, Bash Scripting

Methodologies – Agile, Scrum

Observability & Monitoring – Splunk, Dynatrace

PROJECTS

Java Microservice for Transaction Processing

- Developed a **Java Spring Boot** microservice to process financial transaction messages, implementing asynchronous message consumption from a queue.
- Integrated **Hibernate** with a **PostgreSQL** database to persist transaction records and manage state changes, ensuring data consistency for reconciliation workflows.
- Containerized the application using **Docker** and set up a basic **Jenkins** pipeline for automated build and deployment to an **AWS EC2** instance.

Customer Onboarding Workflow Automation

- Built a **Python** script to automate the creation and configuration of new user accounts and associated resources for enterprise customers.
- Designed a REST API endpoint using **Flask** to receive customer onboarding requests, integrating with internal user management systems.
- Developed a command-line interface for system administrators to manage the onboarding process, including status checks and error reporting.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
