PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and implemented **Java Spring Boot microservices** for trade processing, ensuring synchronous execution with core financial systems and achieving an average p95 latency of **180ms**.
- Developed **Hibernate-based persistence layers** for trade data, managing complex relationships and ensuring data integrity across distributed databases.
- Engineered **JUnit and Mockito test suites** for Java applications, increasing code coverage by **22%** and reducing production defects by **15%**.
- Contributed to **code reviews** for a team of 5 engineers, providing feedback on design patterns and adherence to coding standards.
- Participated in **agile ceremonies**, including sprint planning and technical estimation, accurately forecasting task completion for a 7-engineer team.
- Supported the migration of **Java applications to the AWS ecosystem**, including configuring EC2 instances and S3 buckets for cloud-native solutions.
- Containerized **Java applications using Docker**, enabling consistent deployment across development, staging, and production environments.

SKILLS

Languages – Java, SQL, Python, R

Frameworks/Libraries – Spring Boot, Hibernate, JPA, JUnit, Mockito, pandas, NumPy, scikit-learn

Databases – Oracle, PostgreSQL, MongoDB, MySQL

Cloud/DevOps – AWS, Docker, Jenkins, Git, Linux

Messaging/Event-Driven – Kafka, Java Messaging System

Methodologies – Agile, CI/CD

PROJECTS

Java Trade Processing Microservices (HCL Technologies)

- Developed a suite of **Java Spring Boot microservices** to handle trade settlement workflows, integrating with upstream and downstream financial systems.
- Implemented an **event-driven architecture** utilizing Kafka to decouple services and ensure asynchronous processing of trade messages, improving system resilience.
- Managed database interactions using **Hibernate**, optimizing queries for performance and ensuring data consistency for over **50,000** trade records processed weekly.

Cloud Migration & Observability (HCL Technologies)

- Migrated a legacy Java application to **AWS**, re-architecting components for better scalability and cost-efficiency using EC2 and S3.
- Integrated **Dynatrace** for application performance monitoring, establishing baseline metrics and alerts for critical trade processing functions.
- Containerized the application using **Docker**, streamlining the deployment pipeline managed via Jenkins.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
