PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and implemented attribute logic using **Python** and **Java**, collaborating with modeling teams to translate business requirements into production-ready code for a data analytics platform.
- Developed and maintained complex data attributes, ensuring quality, completeness, and consistency through constant monitoring and auditing using **Python** and **SQL**.
- Resolved moderately complex bug fixes in attribute development applications, ensuring smooth operation and accurate data processing for enterprise-level solutions.
- Authored and updated comprehensive documentation for all attributes and attribute sets, serving as a primary reference for internal and external stakeholders.
- Contributed to the enhancement of the attribute development application by recommending and implementing operational improvements, ensuring its continued efficiency.
- Worked alongside other programmers to ensure the accurate implementation of new attributes within the production environment, adhering to strict quality standards.
- Containerized attribute processing services using **Docker** and deployed them to cloud infrastructure, managing application configurations and resource allocation for reliable execution.

SKILLS

Programming Languages – Python, Java, SQL, ECL, C++

Data Analysis & Modelling – Attribute Development, Data Manipulation, Data Analysis, Statistical Analysis, Machine Learning Fundamentals

Databases – Relational Databases, PostgreSQL, MySQL, Oracle

Tools & Technologies – KEL, Docker, Git, Jenkins, Jira, Confluence

Methodologies – Agile, Scrum, Change Management

PROJECTS

Attribute Logic Development for Insurance Risk Solutions

- Developed and tested new data attributes using **Python** and **SQL** for an insurance risk assessment platform, focusing on data quality and consistency for approximately 50 new attribute types.
- Collaborated with the modeling team to define requirements for complex attributes, translating them into functional code that processed sensitive data sources.
- Documented all attribute logic and data lineage meticulously, creating user guides that reduced onboarding time for new analysts by 15%.

Data Quality and Bug Resolution Framework

- Engineered automated Python scripts to identify and flag data inconsistencies in attribute sets, reducing manual audit effort by 40% and catching ~2,000 anomalies per quarter.
- Implemented a systematic bug-fixing process for attribute logic, resolving an average of 5 critical issues per sprint and improving overall system stability.
- Integrated monitoring tools to track attribute performance and error rates in the production environment, providing actionable insights for continuous improvement.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
