PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **AI and ML-enabled services** using Python, collaborating with senior engineers to integrate model inference endpoints into production systems.
- Contributed to **ML pipelines** for data preparation and feature engineering, supporting experimentation workflows for model development.
- Participated in the deployment and operation of **ML models in production** environments, focusing on reliability and performance monitoring.
- Debugged and improved existing **AI systems**, ensuring uptime and performance through root cause analysis and iterative enhancements.
- Collaborated with data scientists to translate **machine learning models** into robust production solutions, ensuring accurate and efficient inference.
- Followed engineering best practices for **testing, documentation, and version control** within an Agile Scrum framework.
- Containerized **AI services** using Docker and managed deployments on AWS EC2 instances, ensuring secure and scalable operation.

SKILLS

AI/ML – Machine Learning, ML Operations, Model Deployment, Inference Services, Feature Engineering, Data Preparation, Responsible AI

Programming Languages – Python, SQL

Libraries & Frameworks – scikit-learn, pandas, NumPy, FastAPI

Cloud & DevOps – AWS, Docker, CI/CD, Jenkins, Git, Kubernetes

Databases – PostgreSQL, MySQL, Oracle

Tools & Platforms – Jira, Confluence, Splunk, Dynatrace

PROJECTS

Production ML Inference Service

- Developed a **Python FastAPI service** to host a scikit-learn classification model for anomaly detection, handling approximately 1,500 requests per hour.
- Engineered a **feature engineering pipeline** using pandas and SQL to transform raw transaction data into model-ready inputs, reducing data preparation time by 40%.
- Implemented **REST API endpoints** for model inference and health checks, integrating with existing enterprise systems via Jenkins CI/CD.

AI System Monitoring and Performance Enhancement

- Built **Python scripts** to aggregate logs from multiple AI services and analyze performance metrics using Splunk, identifying bottlenecks.
- Refactored inference code to improve **p95 latency** from 350ms to 220ms for a high-throughput ML service, supporting a team of 4 engineers.
- Created operational dashboards in **Power BI** to visualize system health and key performance indicators for AI applications.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
