PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and developed **RESTful APIs** and microservices using **Java Spring Boot**, implementing request validation and circuit-breaker patterns for enhanced system resilience.
- Engineered **Python automation scripts** for data extraction and transformation, streamlining ETL processes and reducing manual data handling effort by approximately **40%** for recurring reports.
- Managed production support for enterprise applications, responding to P1/P2 incidents using **Splunk** and **Dynatrace**, ensuring adherence to strict service level agreements.
- Collaborated with senior engineers to implement and evolve technical designs for a next-generation experimentation platform, applying modern architectural patterns and cloud-native technologies.
- Contributed to the modernization and optimization of existing systems, supporting service-based architectures and cloud scalability efforts to handle increasing data volumes and user demand.
- Participated in **design and code reviews**, applying best engineering practices including clean code, comprehensive testing, and security considerations to improve overall code quality.
- Containerized applications using **Docker** and deployed them to cloud environments, configuring basic resource limits and managing container lifecycles for predictable rollouts.

SKILLS

Languages – Java, Python, SQL, R, TypeScript

Frameworks/Libraries – Spring Boot, Hibernate, JPA, pandas, NumPy, scikit-learn, Flask, FastAPI, React, Angular

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch), Azure

Databases – PostgreSQL, MySQL, Oracle, Databricks, Spark

Tools & Technologies – Docker, Kubernetes, Jenkins, Git, Jira, Confluence, Splunk, Dynatrace, Power BI, Tableau, DAX, Power Query

Methodologies – Agile, Scrum, CI/CD

PROJECTS

Cloud-Native Experimentation Platform Services

- Developed scalable backend services and APIs using **Java Spring Boot** and **Python**, deployed on **AWS** infrastructure to support data-driven decision-making features.
- Integrated with **Databricks** and **Spark** for building and consuming data pipelines and analytical workloads within the experimentation platform.
- Containerized microservices using **Docker** and configured deployment pipelines with **Jenkins**, facilitating automated testing and continuous integration.

Data Pipeline and Analytics Dashboard for Business Insights

- Built efficient **Python ETL pipelines** using **pandas** to ingest and transform data from multiple enterprise systems, preparing it for analysis.
- Designed and developed interactive **Power BI dashboards**, incorporating **DAX measures** and complex data models to visualize key performance indicators for business stakeholders.
- Applied **SQL** queries against **PostgreSQL** and **Oracle** databases for data extraction, validation, and ad-hoc analysis, supporting business requirements.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
