PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot REST APIs** for inter-service communication, processing over 1,500 requests per minute during peak hours.
- Implemented robust persistence layers using **Hibernate and JPA**, ensuring data integrity and efficient querying against relational databases.
- Authored comprehensive unit tests using **JUnit and Mockito**, achieving 80% code coverage for critical backend modules and reducing production defects by 18%.
- Collaborated with a 6-person engineering team on **code reviews** and **technical estimations** for new feature development cycles within an Agile Scrum framework.
- Designed and deployed containerized applications using **Docker** on **AWS EC2** instances, streamlining the development-to-production workflow.
- Contributed to the design and implementation of a new **identity management system**, focusing on secure user authentication and authorization flows.
- Managed user access controls and permissions within the **identity platform**, ensuring compliance with internal security policies and reducing unauthorized access attempts by 22%.

SKILLS

Languages – Java, Python, SQL, Shell Scripting

Frameworks/Libraries – Spring Boot, Hibernate, JPA, JUnit, Mockito, pandas, NumPy, Flask, FastAPI

Cloud/DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Databases – PostgreSQL, MySQL, Oracle

Tools/Platforms – Jira, Confluence, Splunk, Dynatrace, Linux

Data Analysis/BI – Power BI, Tableau, R/RStudio, DAX, Power Query

Security/Identity – Authentication, Authorization, TLS, OAuth (conceptual)

PROJECTS

Java Identity Service with Spring Security

- Engineered a **Java Spring Boot microservice** to manage user identities and authentication tokens, serving a critical internal application.
- Integrated **Spring Security** to enforce granular authorization rules based on user roles and permissions, protecting sensitive data resources.
- Developed RESTful endpoints for user registration, login, and profile management, ensuring secure data handling with **Hibernate** and PostgreSQL.

Secure Authentication API for Enterprise Applications

- Built a secure **REST API** using **Java** and **Spring Boot** to provide authentication services to multiple downstream enterprise systems.
- Implemented token-based authentication (JWT) and session management to secure API access, reducing unauthorized data exposure by approximately 30%.
- Deployed the service on **AWS Lambda**, integrating with **API Gateway** for scalable and resilient endpoint availability.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
