PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Administered and troubleshooted a fleet of **500+ Linux servers** in production environments, focusing on performance tuning, memory optimization, and I/O analysis to maintain critical service availability.
- Managed and resolved **P1/P2 incidents** for enterprise applications on AWS, coordinating with cross-functional teams to restore service and performing root cause analysis using **Splunk** and **Dynatrace**.
- Developed and maintained **Python scripts** for automating data ingestion pipelines and generating scheduled operational reports, processing approximately **1.5 TB of data** weekly.
- Designed and implemented **Java Spring Boot REST APIs** for inter-service communication, ensuring proper error handling and efficient data exchange across microservices.
- Supported enterprise business systems, including ERP modules, by managing system configurations through a formal **change-control process** and coordinating User Acceptance Testing.
- Collaborated with enterprise customers to gather technical requirements for system integrations, translating them into actionable development tasks and providing post-implementation support.
- Containerized microservices using **Docker** and deployed them to an **AWS EC2** environment, managing configurations via **Jenkins** CI/CD pipelines for automated builds and deployments.

SKILLS

Cloud Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Azure, GCP

Databases – MongoDB, PostgreSQL, MySQL, Oracle, RDBMS, NoSQL

Operating Systems & Scripting – Linux, Shell Scripting, Python, Bash

Development – Java, Spring Boot, REST APIs, Hibernate, JPA, JavaScript, Node.js, NestJS, Go, Ruby, C/C++

Orchestration & CI/CD – Kubernetes, Docker, Jenkins, Git

Networking & Protocols – DNS, TCP/IP, SSL/TLS

Monitoring & Observability – Splunk, Dynatrace, Prometheus, Grafana, CloudWatch, Nagios, New Relic

PROJECTS

Customer Onboarding Automation for MongoDB Atlas

- Developed a Python-based CLI tool to automate the initial setup and configuration of new customer instances on MongoDB Atlas, reducing manual setup time by **40%** for pilot users.
- Integrated the automation tool with the MongoDB Atlas API to provision clusters, configure security settings, and deploy initial schemas based on customer-defined templates.
- Authored comprehensive user guides and ran two technical onboarding sessions for customer engineering teams, enabling them to independently manage their Atlas environments.

Performance Diagnostics Suite for Enterprise Applications

- Engineered a suite of Python scripts and **Java** modules to analyze performance bottlenecks in enterprise applications, simulating various load conditions against a test environment.
- Integrated diagnostic tools with **Splunk** to collect and correlate application logs, system metrics, and database query performance data, identifying root causes for latency spikes.
- Developed custom dashboards in **Grafana** to visualize key performance indicators (KPIs) and system health metrics, providing clear insights to operations teams for proactive issue resolution.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
