PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** REST APIs for cross-system integrations, processing an average of **2,500 requests per hour**.
- Implemented robust data validation and error handling for **JPA and Hibernate** entities, ensuring data integrity across enterprise applications.
- Authored comprehensive unit tests using **JUnit** and **Mockito**, achieving over **85% code coverage** for critical application modules.
- Designed and implemented automated Python scripts for ETL processes, reducing manual data processing time by **40%** for daily reporting tasks.
- Managed production incidents and SLA adherence for enterprise applications, performing root cause analysis and coordinating fixes within strict timelines.
- Collaborated with cross-functional teams to gather requirements and provide technical input for system enhancements, participating in **Agile/Scrum** ceremonies.
- Containerized Java applications using **Docker** and managed deployments on **AWS EC2** instances, improving deployment consistency.

SKILLS

Backend Development – Java, Spring Boot, REST APIs, Hibernate, JPA, JUnit, Mockito

Scripting & Automation – Python, Shell Scripting

Databases – SQL, PostgreSQL, MySQL, Oracle

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Observability & Support – Splunk, Dynatrace, Jira, Confluence, Incident Response

Data Analytics & BI – Power BI, Tableau, DAX, Power Query, R, scikit-learn

Enterprise Systems – ERP Integration, Change Management

PROJECTS

Java-based Financial Data Ingestion Service

- Developed a **Java Spring Boot** service to ingest and process financial transaction data from multiple sources, handling approximately **1,800 messages per minute**.
- Implemented data transformation logic using **Hibernate** and **PostgreSQL**, ensuring accurate mapping of incoming data to the target schema.
- Integrated the service with an existing enterprise monitoring system, providing real-time operational status and error alerting.

Python-driven Operational Reporting Automation

- Created a suite of **Python** scripts to automate the generation of weekly operational reports from disparate data sources, saving an estimated **10 hours of manual effort** per week.
- Developed data extraction and aggregation routines using **pandas** and **SQL** queries across PostgreSQL and Oracle databases.
- Scheduled and deployed the automation scripts using **Linux cron jobs**, ensuring reliable and timely report delivery to business stakeholders.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
