PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Provided Tier 1 support for the **Dayforce HRIS platform**, troubleshooting system issues and identifying root causes to resolve problems for HR, Payroll, and managers.
- Performed basic **Dayforce configuration** across modules including Core HR, Time & Attendance, and Payroll, ensuring alignment with business requirements and operational needs.
- Monitored and supported **data integrity** across the Dayforce platform through regular audits and validation checks, contributing to improved payroll accuracy and compliance.
- Configured and maintained standard and ad hoc **Dayforce reports**, partnering with HR and Payroll to deliver accurate, timely data for decision-making.
- Supported User Acceptance Testing (UAT) for new **Dayforce functionality** and system enhancements, collaborating with HRIS leadership to optimize system usability.
- Assisted with testing related to regulatory or policy changes, ensuring the **Dayforce platform** remained compliant with evolving legal and operational standards.
- Developed Python scripts for automating data extraction and transformation tasks, improving efficiency for report generation and data validation processes.

SKILLS

HRIS Platforms – Dayforce

HR Processes – Core HR, Time & Attendance, Payroll, Talent Management

System Support & Operations – Tier 1 Support, Troubleshooting, Root Cause Analysis, Incident Resolution, SLA Management

Data Management & Compliance – Data Integrity, Audits, Validation Checks, Regulatory Compliance, GDPR Awareness

Reporting & Analytics – Standard Reporting, Ad Hoc Reporting, Dashboards, Data Visualization

Configuration & Testing – System Configuration, Regression Testing, User Acceptance Testing (UAT)

Scripting & Automation – Python, Shell Scripting

PROJECTS

Dayforce HRIS System Optimization

- Configured new fields and workflows within the **Dayforce HRIS** system to support evolving HR policies and reporting requirements.
- Developed automated validation scripts in **Python** to cross-reference employee data between Dayforce and an internal HR database, reducing manual data entry errors by approximately 15%.
- Documented standard operating procedures for common **Dayforce** tasks, including new hire onboarding and leave request processing, to standardize team workflows.

Automated HR Reporting Pipeline

- Built a Python-based ETL pipeline to extract data from various enterprise systems and load it into a data warehouse for reporting purposes.
- Designed and implemented data validation checks within the pipeline to ensure accuracy and consistency of HR metrics before they were used in reporting.
- Created automated reports using SQL queries against the data warehouse, providing timely insights on employee demographics and HR operations to stakeholders.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
