PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed backend features and REST APIs using **Python** and **Flask**, integrating with PostgreSQL databases to manage application data.
- Built frontend components and user interfaces with **React** and **TypeScript**, focusing on creating maintainable and reusable UI elements.
- Collaborated with senior engineers and product stakeholders to define requirements and deliver new features for a greenfield workforce education platform, participating in daily stand-ups and sprint planning.
- Authored clean, well-tested code for backend services and frontend components, adhering to team standards and participating actively in code reviews to ensure quality and knowledge sharing.
- Contributed to the continuous improvement of the product and engineering practices by identifying areas for refactoring and proposing solutions for performance enhancements.
- Containerized backend services using **Docker** for consistent deployment across development and staging environments, with basic configuration for resource limits on **AWS EC2**.
- Supported the implementation of AI-assisted development tools within the team's workflow, contributing to prompt engineering best practices for code generation and debugging.

SKILLS

Backend Development – Python, Flask, REST APIs, PostgreSQL, SQL

Frontend Development – React, TypeScript, HTML, CSS

DevOps & Cloud – Docker, AWS EC2, Jenkins, Git

Methodologies – Agile, Scrum, Code Reviews

Data & Analytics – pandas, NumPy, R, Power BI, DAX

PROJECTS

Greenfield Workforce Education Platform Backend

- Developed core backend services and REST APIs using **Python** and **Flask** for a new certification and assessment platform, handling user authentication and data persistence in **PostgreSQL**.
- Implemented asynchronous task processing for report generation and data ingestion using **Celery**, improving response times for user-initiated operations by approximately 30%.
- Containerized the backend microservices with **Docker**, ensuring consistent deployment pipelines managed via **Jenkins** on **AWS EC2** instances.

Interactive Learner Progress Dashboard

- Built a dynamic frontend dashboard using **React** and **TypeScript** to visualize learner progress and assessment results for a pilot customer group.
- Designed and implemented data fetching logic to integrate with backend APIs, displaying key metrics and performance trends for educational modules.
- Developed custom charting components and interactive data filtering mechanisms to enhance user experience and provide actionable insights.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
