PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot REST APIs** for internal service communication, handling approximately 4,000 requests per minute during peak hours.
- Implemented robust **Hibernate and JPA** mappings for complex relational database schemas, ensuring data integrity across multiple financial transaction tables.
- Designed and executed unit tests using **JUnit and Mockito** for critical Java modules, achieving over 85% code coverage for new feature development.
- Analyzed and debugged production issues across enterprise systems using **Splunk and Dynatrace**, contributing to the resolution of 15+ P1/P2 incidents within SLA targets.
- Automated data extraction and transformation tasks using **Python scripting**, reducing manual reporting effort by approximately 10 hours per week for the operations team.
- Managed and refined **CI/CD pipelines in Jenkins** for Java applications, including automated build, test, and deployment stages across development and staging environments.
- Deployed containerized Java applications to **AWS EC2 instances**, configuring security groups and load balancers to ensure high availability.

SKILLS

Backend Development – Java, Spring Boot, REST APIs, Hibernate, JPA, JUnit, Mockito, Maven

Data Management – SQL, PostgreSQL, MySQL, Oracle, Data Warehousing, Data Modelling

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Scripting & Automation – Python, Shell Scripting

Observability & Support – Splunk, Dynatrace, Jira, Confluence, Incident Response

Data Analytics & BI – Power BI, Tableau, DAX, Power Query, R, pandas, NumPy, scikit-learn

ERP & Enterprise Systems – ERP Integration Support, Change Management

PROJECTS

Enterprise Java Application Modernization (HCL Technologies)

- Refactored legacy Java modules into a microservices architecture using **Spring Boot**, improving system modularity and maintainability for core enterprise functions.
- Integrated a new **JPA/Hibernate** persistence layer to manage data for the modernized services, replacing an outdated data access pattern and improving query performance by **~18%**.
- Containerized the new microservices with **Docker** and established initial CI/CD pipelines using **Jenkins** for automated testing and deployment to development environments.

Automated Transaction Reconciliation System (HCL Technologies)

- Developed a **Python**-based ETL pipeline to ingest and reconcile transaction data from multiple sources, reducing manual reconciliation time by approximately **30%**.
- Implemented data validation checks and error reporting within the pipeline using **pandas**, identifying and flagging discrepancies for further investigation by operations teams.
- Stored processed reconciliation summaries in a **PostgreSQL** database, enabling ad-hoc querying for audit and reporting purposes.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
