## PROFESSIONAL EXPERIENCE

---

### Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and validated complex data sets for actuarial analyses, ensuring accuracy and compliance through rigorous data quality checks and reconciliations for a large financial services client.
- Supported the testing and maintenance of actuarial models and assumptions, contributing to the generation of routine and structured analyses using established methodologies.
- Assisted in the development of data sets for actuarial modeling, performing data validation and quality checks to ensure accuracy and adherence to established processes.
- Implemented **Python** scripts to automate data extraction and transformation tasks, reducing manual effort by approximately **40%** for recurring reporting cycles.
- Designed and built **Power BI** dashboards to visualize key performance indicators and analytical findings, enabling business stakeholders to make data-informed decisions.
- Collaborated with senior actuaries and analysts on the development, testing, and maintenance of actuarial models and reports, following defined guidance and best practices.
- Managed and monitored **Java** Spring Boot applications in production using **Splunk** and **Dynatrace**, responding to P1/P2 incidents and ensuring adherence to SLAs.

## SKILLS

---

**Actuarial Analysis** – Actuarial Mathematics, Financial Mathematics, Actuarial Models, Data Validation, Data Reconciliation, Predictive Modeling

**Programming & Scripting** – Python, R, SQL, Java, Spring Boot

**Data Visualization & BI** – Power BI, Tableau, DAX, Charts, Graphs

**Tools & Technologies** – MS Excel, AWS, Docker, Jenkins, Git, Jira, Confluence

**Data Handling** – Data Sets, Data Quality Checks, ETL, Data Warehousing

**Domain Knowledge** – Healthcare Claims, Health Outcomes, Business Operations

## PROJECTS

---

### Actuarial Data Validation Framework

- Developed a **Python**-based framework to automate data validation and reconciliation processes for actuarial datasets, identifying and flagging discrepancies with **95%** accuracy.
- Integrated **SQL** queries to extract and transform data from multiple sources, ensuring data integrity for use in complex actuarial calculations and model development.
- Created interactive **Power BI** reports to visualize data quality metrics and reconciliation status, providing clear insights to the actuarial team on data completeness.

### Healthcare Claims Analysis Dashboard

- Built an end-to-end **Power BI** dashboard to analyze historical healthcare claims data, visualizing trends in costs, diagnosis codes, and procedure codes.
- Applied **DAX** measures and **Power Query** to model and transform a large dataset of ~150,000 claims, enabling detailed drill-down analysis.
- Collaborated with business analysts to gather requirements and present dashboard findings, facilitating a better understanding of key cost drivers within the healthcare system.

## EDUCATION

---

### M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

### B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

## CERTIFICATIONS

---

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
