PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Managed and enhanced a **payments operations dashboard** for a financial-services client, focusing on **transaction monitoring** and **alerting for failed payment messages**, improving operational visibility for the team.
- Developed Python scripts to automate daily ETL processes, aggregating data from disparate sources into a central data warehouse, reducing manual data preparation time by approximately **30%**.
- Designed and implemented **REST APIs** using **Java Spring Boot** for internal services, facilitating cross-system data exchange and supporting new feature development.
- Collaborated with operations and business analysts to gather requirements for reporting enhancements, translating business needs into technical specifications for dashboard development and data analysis.
- Performed production support for enterprise applications, including **incident response** for P1/P2 issues and root cause analysis using **Splunk** and **Dynatrace**, ensuring adherence to SLAs.
- Contributed to the design and maintenance of CI/CD pipelines using **Jenkins** and **Git**, ensuring consistent and reliable deployment of application updates.
- Containerized several Java Spring Boot microservices using **Docker**, improving deployment consistency and enabling easier management of application dependencies on **AWS EC2**.

SKILLS

Programming Languages – Java, Python, SQL, R, DAX.

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn, Flask, FastAPI.

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git.

Databases – PostgreSQL, MySQL, Oracle.

BI & Analytics Tools – Power BI, Tableau, RStudio.

Enterprise Systems – ERP integration support, Change Management.

Monitoring & Observability – Splunk, Dynatrace.

PROJECTS

Financial Transaction Analysis Dashboard (HCL Technologies)

- Developed a **Power BI dashboard** to visualize key operational metrics for a financial-services client, including **transaction volumes** and failure rates, enabling better performance tracking.
- Engineered Python ETL scripts to extract, transform, and load transaction data from multiple sources into a structured format suitable for analysis and reporting.
- Designed and implemented **DAX measures** within Power BI to calculate critical KPIs, providing stakeholders with actionable insights into payment processing efficiency.

Automated Reporting System for Business Operations (HCL Technologies)

- Built a suite of **Python scripts** to automate the generation of weekly and monthly operational reports, consolidating data from **PostgreSQL** and **Oracle** databases.
- Integrated the reporting system with **Jira** to track report generation status and issues, ensuring timely delivery and transparency for business users.
- Refactored existing manual report generation processes, reducing the time spent on data compilation and formatting by an estimated **40%**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
