PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and implemented **Java Spring Boot** REST APIs for core platform services, handling request validation and circuit-breaker patterns to manage inter-service communication.
- Developed and maintained **JPA** entities and Hibernate mappings for a relational database, ensuring data integrity and efficient object-relational mapping across multiple application modules.
- Authored comprehensive unit and integration tests using **JUnit** and Mockito for a critical Java service, achieving over 90% code coverage and reducing regression defects by **15%**.
- Contributed to the enhancement of externally consumable **REST APIs**, focusing on security implementation and feature delivery within a value stream team.
- Participated in sprint ceremonies, design discussions, and technical reviews, collaborating with a multidisciplinary team to deliver product enhancements.
- Integrated **observability** practices into production systems, including logging and monitoring for external APIs to support operational evaluations and incident response.
- Containerized **Java Spring Boot** applications using Docker and deployed them to an AWS environment, managing EC2 instances and S3 bucket configurations.

SKILLS

Backend Development – Java, Spring Boot, REST APIs, JPA, Hibernate, Microservices, JUnit, Mockito, Maven

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch), Azure, GCP

API Security – Spring Security, OAuth, Token Management

Observability & Monitoring – Splunk, Dynatrace, CloudWatch, Logging, Alerting

DevOps & CI/CD – Docker, Jenkins, GitHub Actions, Git

Databases – PostgreSQL, MySQL, Oracle

Scripting & Automation – Python

PROJECTS

Java Spring Boot Microservices for Enterprise Integration

- Developed a suite of **Java Spring Boot** microservices to handle inter-application communication, replacing a monolithic architecture and improving system modularity.
- Implemented robust data persistence using **JPA and Hibernate**, connecting to a PostgreSQL database and managing complex transactional workflows.
- Containerized services with **Docker** and configured basic CI/CD pipelines using Jenkins for automated builds and deployments to AWS EC2 instances.

API Gateway and Security Implementation

- Engineered a central **REST API** gateway using Spring Boot to manage and secure external-facing endpoints, including rate limiting and request filtering.
- Integrated **Spring Security** and implemented token-based authentication mechanisms to secure API access for client applications, enhancing overall system security posture.
- Documented API specifications and collaborated with client integration teams to ensure smooth adoption and adherence to security protocols.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
