PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Engineered **Java Spring Boot** microservices to handle high-throughput transaction processing for a financial-services dashboard, processing approximately **15,000 transactions** per hour.
- Developed and maintained **JPA/Hibernate** entities and queries for a PostgreSQL database, ensuring data integrity and efficient retrieval for operational reporting.
- Designed and implemented **JUnit** and **Mockito** test suites for critical Java backend services, increasing code coverage by **20%** and reducing production defects.
- Built and deployed **Python** automation scripts to streamline data validation and ETL processes for enterprise business systems, reducing manual effort by **30%**.
- Managed production incidents for enterprise applications on **AWS** using **Splunk** and **Dynatrace**, resolving P1/P2 issues within defined SLAs.
- Containerized Java microservices using **Docker**, enabling consistent deployment across development and production environments.
- Collaborated with cross-functional teams during Agile ceremonies to define technical requirements and provide estimates for new feature development.

SKILLS

Backend Development – Java, Spring Boot, REST APIs, Hibernate, JPA, JUnit, Mockito, Maven, Gradle

Data Management – SQL, PostgreSQL, MySQL, Oracle, Data Warehousing, ETL

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, CI/CD

Scripting & Automation – Python, Shell Scripting

Analytics & BI – Power BI, Tableau, DAX, Power Query, R/RStudio, pandas, NumPy, scikit-learn

Observability & Support – Splunk, Dynatrace, Jira, Confluence, Linux

PROJECTS

Enterprise Java Payments Dashboard Enhancement

- Developed new **Java Spring Boot** modules to enhance real-time transaction monitoring capabilities for a financial services operations dashboard.
- Implemented robust **JPA/Hibernate** data access layers to integrate with existing PostgreSQL databases, improving data retrieval performance for operational alerts.
- Wrote comprehensive **JUnit** test cases to ensure the reliability of new features, contributing to a smoother UAT phase with business analysts.

Python-Based ETL Pipeline for ERP Integration

- Engineered a **Python**-based ETL pipeline to extract, transform, and load data from legacy ERP systems into a central data warehouse.
- Automated report generation using **pandas** and scheduled execution via cron jobs on Linux, reducing report delivery time from daily to on-demand.
- Performed data validation and quality checks using **SQL** queries across PostgreSQL and Oracle databases to ensure data accuracy for downstream analytics.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
