PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and implemented Python ETL pipelines on AWS Lambda and S3 to process and store ~1.5TB of raw data weekly, replacing a manual data ingestion process.
- Developed and maintained Java Spring Boot microservices for enterprise applications, focusing on REST API development and integration with PostgreSQL databases.
- Managed production support for critical Java and .NET applications, resolving P1/P2 incidents within SLA and analyzing logs using Splunk and Dynatrace to identify root causes.
- Engineered a Python-based data processing framework to automate report generation for financial operations, reducing manual effort by approximately 8 hours per week.
- Built and optimized SQL queries across PostgreSQL and Oracle databases for data validation and ad-hoc reporting, supporting change management processes for ERP systems.
- Containerized multiple Java Spring Boot services using Docker and deployed them to AWS EC2 instances, improving deployment consistency and reducing setup time by ~30%.
- Collaborated with cross-functional teams to gather requirements for enterprise business system integrations, coordinating UAT and providing post-go-live support.

SKILLS

Programming Languages – Python, Java, SQL, R

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn, Flask, FastAPI

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Databases – PostgreSQL, MySQL, Oracle

BI & Analytics Tools – Power BI, Tableau, DAX, Power Query, RStudio

Observability & Support Tools – Splunk, Dynatrace

Methodologies – Agile, Scrum

PROJECTS

HCL Technologies: Automated Data Processing for Financial Operations

- Developed a Python-based workflow to automate the extraction, transformation, and loading of transaction data from disparate sources into a central PostgreSQL data warehouse.
- Implemented data validation checks and error handling within the ETL process, ensuring data integrity for downstream reporting and analysis, processing approximately 1.2 million records daily.
- Containerized the data processing application using Docker, enabling consistent deployment across development and production environments on AWS.

MSc Capstone: Interactive Sales Performance Dashboard with Power BI

- Designed and built an interactive Power BI dashboard to visualize key sales metrics, including revenue, customer acquisition, and product performance, for business stakeholders.
- Developed complex DAX measures and performed data modeling within Power BI to derive actionable insights from a multi-source sales dataset.
- Utilized Power Query to clean and transform raw sales data, creating a robust data foundation for the dashboard and subsequent analysis.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
