PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Engineered Python ETL pipelines for the financial-services dashboard, processing approximately 1.5 million transaction records weekly to support operational reporting.
- Developed and maintained Java Spring Boot REST APIs for cross-system integrations, handling an average of 500 requests per minute during peak hours.
- Managed production support for enterprise applications using **Splunk** and **Dynatrace**, leading P1/P2 incident response and ensuring adherence to strict SLAs.
- Designed and implemented **Power BI** dashboards and DAX measures for MSc Data Analytics coursework, providing actionable insights from complex datasets to stakeholders.
- Contributed to the development of a payments operations dashboard by implementing Java features and resolving defects, focusing on transaction monitoring and reconciliation workflows.
- Collaborated with business analysts and operations teams to gather requirements, support UAT, and perform post-implementation triage for enterprise business systems.
- Containerized Java Spring Boot microservices using **Docker** and deployed to **AWS EC2** instances, streamlining the application deployment process.

SKILLS

Programming Languages – Java, Python, SQL, R, Bash

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn, Hibernate, JPA, Flask, FastAPI

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Databases – PostgreSQL, MySQL, Oracle

BI & Data Analytics – Power BI, Tableau, DAX, Power Query, Data Modelling, ETL, Statistical Analysis

Monitoring & Support – Splunk, Dynatrace, Jira, Confluence

PROJECTS

HCL Technologies: Financial Operations Dashboard Enhancement

- Developed new Java Spring Boot microservices to ingest and process transaction data from multiple sources for a financial-services client's operations dashboard, handling approximately 2,800 messages per second.
- Refactored existing Python ETL scripts to improve data validation and error handling, reducing data-related incident tickets by 20% for the payments monitoring system.
- Created detailed technical documentation and runbooks for the enhanced dashboard features, enabling faster onboarding for new support engineers.

MSc Data Analytics: Customer Churn Prediction Model

- Engineered a feature pipeline using Python and pandas on a dataset of 150,000 customer records to extract relevant behavioural signals for churn prediction.
- Trained a **scikit-learn** logistic regression model to predict customer churn, achieving **82% accuracy** and **0.75 AUC** on a held-out test set.
- Built an interactive **Power BI** dashboard to visualize churn drivers and model performance, presenting findings to academic supervisors and peers.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
