## PROFESSIONAL EXPERIENCE

---

### Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and implemented **REST APIs** using **Java Spring Boot** for core business services, handling approximately 2,800 requests per minute during peak hours.
- Engineered and maintained **Hibernate** ORM mappings and optimized **SQL** queries across **PostgreSQL** and **Oracle** databases, reducing average query execution time by 18% for critical reporting functions.
- Developed and maintained JUnit test suites for Java Spring Boot applications, achieving over 85% code coverage for new feature development and improving overall code quality.
- Managed and enhanced **automated controls** on externally consumable **REST APIs**, implementing rate limiting and input validation to enhance security and performance.
- Integrated **observability** into production systems by configuring **Splunk** and **Dynatrace** alerts for API endpoints, enabling proactive issue detection and reducing P1 incident response time by 22%.
- Participated in cross-functional **value stream team** ceremonies, including sprint planning and technical design discussions, contributing to the delivery of enhancements for existing BI products.
- Containerized **Java Spring Boot** applications using **Docker** and deployed them to an **AWS EC2** environment, managing configurations and basic resource allocation.

## SKILLS

---

**Backend Development** – Java, Spring Boot, REST APIs, Hibernate, JPA, JUnit, Mockito, Maven, Gradle

**Databases** – SQL, PostgreSQL, MySQL, Oracle

**Cloud Platforms** – AWS (EC2, S3, Lambda, CloudWatch)

**DevOps & CI/CD** – Docker, Jenkins, GitHub Actions, Git

**Observability & Monitoring** – Splunk, Dynatrace, CloudWatch

**Scripting & Automation** – Python, Shell Scripting

**BI & Analytics** – Power BI, Tableau, DAX, Power Query

## PROJECTS

---

### Java Spring Boot Microservice for Transaction Processing

- Developed a **Java Spring Boot** microservice to process financial transaction data, integrating with a **PostgreSQL** database for persistence.
- Implemented **RESTful endpoints** for initiating and querying transaction statuses, handling an average of 500 requests per minute.
- Wrote comprehensive **JUnit** tests to ensure service reliability and maintainability, covering critical business logic paths.

### API Security Enhancement and Client Token Management

- Implemented **Spring Security** configurations to secure **publicly consumable REST APIs**, including OAuth2 integration for authentication.
- Developed features for **self-serve client token lifecycle management**, allowing customers to generate and revoke API access tokens through a dedicated portal.
- Integrated logging and monitoring using **AWS CloudWatch** to track API usage and identify potential security threats.

## EDUCATION

---

**M.Sc. Data Analytics** — National College of Ireland, Dublin

Feb 2026

**B.E. Computer Science** — SNS College of Technology, Coimbatore, India

2021

## CERTIFICATIONS

---

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
